

I. GROWTH OF THE FOREIGN SEA-BORNE TRADE OF INDIA

(a) In a decade

1906-07 to 1915-16

(b) During Half a Century

1867-68 to 1915-16

Note:—

1. Each division of the ordinate represents 15 crores equal to Rs. 1,500 lakhs.
2. The curves for 1867-68 and 1914-16 represent averages for two years.
3. Total merchandise includes Imports and Exports, both private and Government.
4. Imports of merchandise are inclusive of Government stores.
5. Exports of merchandise are inclusive of re-exports and Government stores.
6. Net Imports of Treasure are the imports ~~minus~~ the exports of Gold and Silver, both private and Government.

INDIAN RAILWAYS

2. CAPITAL OUTLAY, GROSS EARNINGS, AND WORKING EXPENSES

(26 years—1890 to 1915-16.)

1890 '91 '92 '93 '94 '95 '96 '97 '98 '99 1900 '01 '02 '03 '04 '05 '06 '07 '08 '09 '10 '11 '12 '13 '14-15 '15-16

MARQUIS OF LANSDOWNE EARL OF ELGIN LORD CURZON EARL OF MINTO LORD HARDINGE
PERCENTAGE OF WORKING EXPENSES TO GROSS EARNINGS, PERCENTAGE OF NET EARNINGS ON CAPITAL OUTLAY
ON LINES OPEN AND PARTLY OPEN, AND NUMBER OF MILES OPEN FOR TRAFFIC

1890 '91 '92 '93 '94 '95 '96 '97 '98 '99 1900 '01 '02 '03 '04 '05 '06 '07 '08 '09 '10 '11 '12 '13 '14-15 '15-16

Note.—The "Total Capital Outlay" is that on all Indian Railways, viz., (i) open, (ii) partly or wholly under construction, and (iii) on miscellaneous items; while for the purposes of the "percentages on net earnings on capital outlay" the item (i) open lines only is reckoned.

Statistics of British India*

Vol. I.—Commercial Statistics

INTRODUCTORY NOTE

The Statistical tables in this volume deal with industries, mills, mines, joint-stock companies, foreign trade and shipping, post office, telegraphs, railways, and irrigation. Special steps were taken to bring the tables more up to date and the statistics are therefore brought up to the period ending 31st March, 1916. Three charts showing (i) the growth of the Foreign Seaborne Trade of India, (ii) capital outlay, gross earnings, and working expenses of Indian Railways, and (iii) gross earnings and working expenses on the principal systems of Railways in India have been added, with also an index for easy reference.

SUMMARY TABLE

Table No. 1 gives the salient features of each section of the Commercial Statistics included in this volume.

INDUSTRIAL CENSUS

[FOR TABLE, SEE PAGE 5]

Table No. 2 shows the main results of the Industrial Census taken at the time of the Population Census of 1911. A caveat, however, should be added regarding the possibility of obtaining an industrial census from a population census. Experience has proved that one cannot hope for an industrial census from a population census, especially in India, for several reasons as explained in Appendix K to the "Report on the Enquiry into the Rise of Prices in India." The chief reasons are: (1) change of means of livelihood with the season; for instance, the same man at one time may be a field-worker, at another an earthdigger, and again a porter, saltpetre worker, paddy husker, *palki*-bearer, firewood-collector, etc., so that the head under which he will appear in the occupation table depends on the date fixed for the enumeration. (2) Combination of occupations; a worker frequently combines several occupations wholly unconnected with one another, so that at the census he is unable to say which is his chief means of support. (3) Mixed occupations; for instance, money-lending and grain-dealing are in many parts merely different aspects of the same business. (4) Confusion of thought between a man's caste which connotes his traditional occupation, and the means of livelihood by which he actually subsists; for instance, a man of the barber caste will often call himself a barber even when his income is derived from agriculture or some other employment. It may be noted that this difficulty of classification according to occupation from a population census is not confined to India alone. In the United States and in Germany, it has been held that a population census cannot be expected to give the requisite information regarding occupation, and that a comprehensive industrial survey obtained by detailed investigation and spread over a considerable time is to be preferred. In the report of the census of England and Wales for 1891 it is said: "A census * * does not supply data which are suitable for minute classification or admit of profitable examination in detail. The most that it is reasonable to expect from data so collected is that they shall give the means of drawing such a picture of the occupational distribution of the people as shall be fairly true in its main lines, though little value can be attached to the detailed features. It is not wise to demand from a material a result for the production of which it is unsuited."

LARGE INDUSTRIAL ESTABLISHMENTS

[FOR TABLES, SEE PAGES 6 to 52]

The conditions of factory labour until 1st July, 1912, were regulated by the Indian Factories Act, XV of 1881, as amended by Act XI of 1891. The chief provisions of the amended Act were: Local Governments were empowered to appoint inspectors of factories, and certifying surgeons to certify as to the age of children. A midday stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The hours for employment for women and children were fixed with intervals of rest; and provision was made for the fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of over-crowding, etc.

The decision to undertake further legislation was arrived at after comprehensive enquiries. An important factor in the case was the increasing use of electric light in the Bombay mills, which radically changed the conditions prevailing when the Act of 1891 was passed and had abolished the security that operatives would not be employed for more than 12 hours a day on the average. The question of the hours of employment in textile factories was brought into prominence by the period of prosperity that the cotton industry began to enjoy in the cold weather of 1904-05, a large number of operatives being regularly employed for 15 hours a day or even longer. Owing to complaints regarding the long hours worked in many mills, the Government of India in 1906 appointed a small Committee to conduct a preliminary inquiry into the conditions of labour in textile factories. The con-

* The previous issue of these Statistical Volumes was published under the title of "Statistical Abstract for British India"

clusions arrived at by this Committee formed the basis of an investigation, extending to all factories in India by a representative Commission. The recommendations of the Committee and of the Commission having been considered by the Government of India and the Local Governments, a Bill was introduced in July, 1908, to amend and consolidate the law relating to factories, and was finally passed into law as Act XII of 1911. The new Act, which came into force on 1st July, 1912, defines the term "factory" as any premises wherein, or within the precincts of which, steam, water or other mechanical power or electrical power is used in aid of any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, for transport or for sale any article or part of an article. The term does not apply to (a) any mine subject to the operation of the Indian Mines Act, or (b) any electrical generating or transforming station, or (c) any indigo factory, or (d) any factory situated on and used solely for the purposes of a tea or coffee plantation, or (e) any factory wherein on no day in the year are more than forty-nine persons simultaneously employed: provided that the Local Government may apply all or any of the provisions of this Act to any factory or class of factories wherein any specified number of persons, not being less than twenty, are on any day simultaneously employed. The Act has limited the hours within which children and women may be employed, and has further restricted the employment of women by night except in certain cases. It also contains a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act.

Tables Nos. 3, 4, 5, and 6 deal not only with factories, as defined above, which come under the operation of the Indian Factories Act, but also include concerns which do not come under the operation of the Act but which are considered to be of sufficient industrial importance, excluding mines, electrical generating stations, indigo factories, and factories situated on and used for the purposes of tea and coffee plantations. Tables Nos. 7, 7-A, 8, 9, and 9-A deal only with factories coming under the operation of the Act. Industrial concerns owned by Government, State Darbars, and local bodies are dealt with in table No. 3. Those owned by companies or individuals are dealt with in tables Nos. 4, 5, and 6, factories worked by mechanical or electrical power and those not so worked being shown separately in tables Nos. 5 and 6.

The total number of factories and industrial concerns of all classes dealt with in these tables was 4,053 in 1915 as against 4,044 in 1914. From the reports on the working of the Indian Factories Act it appears that in 1915 there were within the scope of the Act 121 factories, belonging to the State and to local bodies, such as municipalities and port trusts, as against 118 in 1914. Among these there were 28 printing presses, 19 railway workshops, 16 canal and engineering workshops, and a considerable number of military arsenals and factories. In addition to these 121 factories, there were 31 more concerns which did not come within the operation of the Indian Factories Act. The total number of factories owned by Government and local bodies in British India thus comes to 152 in 1915 as against 180 in 1914, the important of these being shown in the margin. These figures do not include factories situated in Native States and owned by State Darbars. So far as reports have been received, the total number of factories owned by State Darbars was 19.

Of the factories owned by companies or individuals, those worked by mechanical or electrical power numbered 3,458 in 1915 as against 3,394 in 1914; the more important of these are stated in the margin. These represent about 81 per cent of the total number of factories worked by mechanical or electrical power in all India (including those in Native States so far as reported). The factories created by the cotton industry exist principally in Bombay and those relating to the jute industry in Bengal; while rice mills and saw mills are naturally mostly in Burma. Of the other factories there are none largely assigned to any particular industry. Besides these, there were 424 concerns not worked by mechanical or electrical power, including 38 stone factories, 16 silk filatures, 54 lac factories, 22 tanneries and leather works and 4 printing presses.

The daily average number of persons employed in all the factories in India, whether worked by mechanical or electrical power or not so worked, and whether owned by Government or local bodies or by companies or individuals, was 1,135,147 in 1915, as against 1,162,905 in 1914 and 1,090,114 in 1913. Of these the number employed in factories under the Act was 1,004,106, as against 950,973 in 1914 and 936,390 in 1913 as shown in the margin. Of this total 378,235 (being 37 per cent) were employed in factories in Bengal, and 280,566 (being 27 per cent) in Bombay, these two provinces employing nearly two-thirds of the factory labour of India.

There were 5,452 accidents, causing death or bodily injury to operatives, reported in 1915, as against 4,929 in 1914. Of these 115 were attended with fatal results, 42 occurring in Bengal and 21 in Bombay. Bengal also had the largest number of serious accidents, namely, 448, against 67 in Bombay, 121 in Burma, 91 in the United Provinces, and 21 in the Punjab. Much the largest number of minor accidents—1,682 out of a total of 4,414—occurred in Bombay, where cotton mills and presses predominate.

There were 97 convictions in respect of offences against the Factories Act in 1915. Of these 34 were for the employment of persons in contravention of the Act, 19 for neglect to fence machinery, etc., and 7 for neglect of ventilation and cleanliness.

Definitions of
the term
"factory"

Number of
concerns

	1914	1915
Printing presses	36	34
Railway workshops	32	20
Engineering workshops	16	16
Municipal workshops	9	8

Convictions

BREWERIES

[FOR TABLE, SEE PAGE 53]

According to the statistics of 1915, there are 18 breweries in operation in British India. Ten of the breweries are located at stations in the Himalayas from Murree to Darjeeling. The largest brewery is the one at Bangalore; the Murree, Yellanhalli, Rawalpindi, Quetta, Kasauli, Ootacamund, Mandalay, and Naduvakarai breweries standing next in the order shown.

Production was largest in 1902, since when it has tended to decline, while imports of foreign beer have increased proportionately; in the year 1907, the process was reversed, internal production having advanced slightly and imports decreased. Since then until the outbreak of war there was a steady decrease in the production, while the imports, after declining up to 1911 (with a small set-back in 1910), recovered appreciably in 1912 and rose higher in 1913. From 1914 the imports have decreased, owing to the difficulty in obtaining freight, the absence of a large portion of the British Regular Army from India, and the shortage of light German beer. In 1915 the total quantity brewed in British India was 2,533,000 gallons and that imported from foreign countries 2,818,000 gallons, as against 3,434,000 gallons and 4,213,000 gallons, respectively in the preceding year.

COTTON MILLS

[FOR TABLES, SEE PAGES 54 TO 74]

The Indian cotton industry dates as far back as 1851, when the first mill was started, but complete statistics were not reported until 1879-80. The following statement shows quinquennial averages from that year to 1913-14 and annual figures for 1914-15 and 1915-16. The figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100: (Sterling capital has been converted into rupees at the average rate of exchange for the period)

	Number of mills at work	Authorised Capital (in lakhs of R) as far as reported	Number (in thousands) of		
			Persons employed	Looms	Spindles
1879-80 to 1883-84 . . .	63 (106)	657.6 (100)	51.6 (100)	14.5 (100)	1610.6 (100)
1884-85 to 1888-89 . . .	93 (148)	887.9 (135)	75.7 (148)	18.2 (126)	2296.8 (143)
1889-90 to 1893-94 . . .	127 (202)	1161.7 (177)	116.1 (228)	25.3 (175)	3263.8 (203)
1894-95 to 1898-99 . . .	156 (248)	1419.5 (216)	150.0 (294)	36.6 (253)	4046.1 (251)
1899-1900 to 1903-04 . . .	195 (310)	1687.9 (257)	171.6 (336)	42.0 (290)	5000.9 (310)
1904-05 to 1908-09 . . .	218 (346)	1878.7 (286)	216.4 (424)	60.0 (414)	5549.1 (345)
1909-10 to 1913-14 . . .	257 (408)	2243.3 (341)	243.8 (474)	88.1 (608)	6406.4 (398)
1914-15	255 (405)	2220.3 (338)	260.4 (511)	163.3 (712)	6598.1 (410)
1915-16	267 (424)	2291.5 (348)	292.2 (573)	108.4 (748)	6675.7 (414)

It will be seen that the number of persons employed and of looms and spindles in operation have increased to a larger extent than the amount of authorised capital, which, however, has not been reported from many private mills.

At the end of 1915-16 there were in India 267 cotton mills, containing 108,417 looms and 6,675,688 spindles. Of this number, 68 were exclusively spinning mills; 29 were exclusively weaving mills; and in 170 mills both spinning and weaving were carried on. They employed a daily average number of 292,160 persons: 207,361 men, 47,015 women, 27,144 children, and 10,640 unspecified.

The authorised capital of the mills, as far as this information has been furnished, is R22,91,50,560, including the sterling capital of £516,078; of the rupee capital, R18,83,80,686 is paid-up and of the sterling capital £443,325 is paid-up. There are, further, rupee debentures to the value of R3,07,85,600 issued by 41 companies. Twenty-five mills also out of the 36 worked by private proprietors have not reported the capital employed by them, and for these about R20 crores would seem to be a fair estimate. The aggregate of the authorised capital and debentures is thus arrived at nearly R28 crores, and of this R21 crores or £14.3 millions is paid-up.

The mills are located as follows:—

	Number	Authorised capital (R)		Number	Authorised capital (R)
Bombay, Island	86	8,35,41,200	Central Provinces: Nagpur	1	98,87,600

The Bombay Presidency possesses 66 per cent of the mills, 69 per cent of the spindles, and 78 per cent of the looms.

The total production of yarn in the mills in British India, as far as reported, and the figures of exports, are as follows (lbs) :

	Nos. 1 to 25	Above No. 25	Wastes	Total Production	Total Exports
Average 1896-97 to 1900-01	423,906,898	20,082,852	..	443,989,750	198,002,463
„ 1901-02 to 1905-06	537,379,018	39,935,969	..	577,314,987	270,818,888
„ 1906-07 to 1910-11	555,373,854	53,392,346	160,175	608,926,375	228,318,890
1911-12	531,662,851	58,474,610	704,206	590,841,667	161,129,123
1912-13	589,093,564	60,828,059	660,955	650,582,578	214,879,789
1913-14	582,666,736	61,507,343	678,598	644,852,677	206,859,417
1914-15	557,092,101	57,389,499	475,216	614,956,816	142,447,897
1915-16	624,474,474	58,029,663	650,562	683,154,699	168,106,232

In the last quinquennium the annual outturn of yarn has exceeded 590,000,000 lbs in every year. In 1915-16 the output was 683 million lbs, as against 615 million lbs in 1914-15.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 75 per cent of the quantity produced in British India. The United Provinces and Madras produced about 8 per cent and 7 per cent, respectively ; while Bengal and the Central Provinces produced about 5 per cent and 5·4 per cent, respectively. Elsewhere the production is as yet very limited.

There was a continued increase in the production of yarn of counts higher than No. 25, till 1908-09, when the production reached 58 million lbs. Since then it has ranged between 50 million and 61 million lbs, the production in 1915-16 amounting to 58 million lbs, which is above 8 per cent of the whole production. In the Central Provinces, Bengal, the United Provinces, and the Punjab the mills spin hardly any yarn above No. 25, yarn of that count and lower numbers representing 96, 97, 99, and 98 per cent, respectively, of the whole production. In Bombay, however, the spinning of the higher counts (above 25) is over 9 per cent of the whole, and in Madras it is over 15 per cent. Using Egyptian and other imported cotton, the Bombay mills are now spinning in appreciable quantity yarns of No. 40 and upwards. In 1909-10 the production in British India of the finer yarns—Nos. 31 to 40—decreased to 15·5 million lbs from 20 million lbs in 1908-09, but since then there has been an improvement, the output in 1915-16 being 18 million lbs.

It is interesting to note that the imports of yarn from the United Kingdom and other places are about 6 per cent of the total production in British India. The figures are (lbs) :

	Nos 1 to 25	Above No. 25	Unspecified descriptions	Total Imports (including unspecified descriptions)
Average 1896-97 to 1900-01	5,654,194	38,315,540	2,317,358	46,287,092
„ 1901-02 to 1905-06	3,571,768	29,095,637	2,602,569	35,269,974
„ 1906-07 to 1910-11	2,608,278	31,574,481	3,680,680	37,863,439
1911-12	1,549,448	35,452,712	4,956,750	41,958,910
1912-13	4,147,598	40,163,550	5,724,062	50,035,210
1913-14	2,150,213	35,202,454	6,818,500	44,171,167
1914-15	813,222	35,864,034	6,187,084	42,864,340
1915-16	1,338,356	33,126,170	5,962,398	40,426,924

The production of woven goods in the mills in British India, as far as reported, has been as follows (lbs) :

	Grey and bleached piece-goods	Other kinds	Total
Average 1896-97 to 1900-01	80,557,484	11,295,465	91,852,949
„ 1901-02 to 1905-06	109,884,271	25,009,554	134,893,825
„ 1906-07 to 1910-11	154,123,927	40,007,307	194,131,234
1911-12	192,977,167	59,149,040	252,126,207
1912-13	196,130,071	71,532,912	267,662,983
1913-14	188,450,593	67,955,409	256,406,002
1914-15	198,253,599	59,926,785	258,180,384
1915-16	249,628,930	81,224,045	330,852,975

Owing to low prices of raw cotton and high prices of cloth, the production increased by about 12½ per cent in 1903-04, and by 15·8 per cent in 1904-05. In the two following years the rate of increase was less rapid. The annual increase from 1907-08 to 1914-15 ranged between 2 per cent and 17 per cent. In 1915-16 the total production reached 331 million lbs, the highest on record, the increase over the preceding year being 28 per cent.

Weaving is concentrated in the Bombay mills to an even greater degree than spinning, the mills of that province producing about 87 per cent of the whole quantity woven in British India. The United Provinces produce about 4 per cent, the Central Provinces nearly 4.2 per cent, and Madras about 3.6 per cent. The goods woven are mainly grey and bleached piece-goods, these representing nearly 76 per cent of the whole production.

The most important kinds of grey and bleached piece-goods woven in the mills are specified below (in lbs)

	Average 1901-02 to 1905-06	Average 1906-07 to 1910-11	1911-12	1912-13	1913-14	1914-15	1915-16
Shirtings and longcloth .	38,611,145	50,679,465	69,447,175	65,358,068	63,250,051	72,059,380	93,200,209
Dhutis	25,448,365	43,970,296	53,439,511	57,025,695	55,850,403	53,975,512	66,625,089
T. cloths, domestics, and sheetings	19,376,545	24,817,341	27,156,897	28,079,482	25,224,257	26,382,077	32,346,559
Chadars	13,628,457	15,678,079	21,781,029	21,221,406	22,347,938	21,512,020	25,003,732

The proportion of woven goods other than grey and bleached piece-goods was highest in Madras, where in 1915-16 it was about 67 per cent. In the Central Provinces the proportion was about 27 per cent and in Bombay 23.6 per cent.

Figures of imports are not readily comparable with those of production, because the former are recorded in yards and the latter up to the year 1906 were recorded in lbs, with the exception of grey and bleached piece-goods; the figures of grey and bleached piece-goods are as follows (in millions of yards):

Comparison of piece-goods imported and produced

	Imported	Produced	Percentage of production to importation
Average 1896-97 to 1900-01	1651.21	319.55	19.3
„ 1901-02 to 1905-06	1741.6	457.38	26.3
„ 1906-07 to 1910-11	1749.45	676.19	39.2
1911-12	1848.46	837.72	45.3
1912-13	2303.88	855.71	35.1
1913-14	2327.53	816.66	35.0
1914-15	1921.46	820.70	42.6
1915-16	1759.65	1024.31	58.2

The yardage of coloured piece-goods from April 1906 was (in millions of yards):

	Imported	Produced	Percentage of production to importation
Average 1906-07 to 1910-11	519.20	152.71	29.4
1911-12	589.43	241.24	40.9
1912-13	682.21	295.41	43.3
1913-14	831.77	277.98	33.3
1914-15	494.77	241.20	48.7
1915-16	358.74	331.50	92.4

To the figures given above for mills in British India, may be added the production in Berar prior to the 1st October, 1903, and in the Native States, which is stated below (in lbs). The States are Mysore, Indore, Baroda, Nandgaon, Bhavnagar, Hyderabad, Wadhwan, Travancore (Quilon), Kishengarh, Gwalior (Ujjain) and Kolhapur. The production of one mill in Pondicherry has been reported from April, 1909:

	Yarn			Woven goods		
	Nos. 1 to 25	Above No. 25	Total	Grey and Bleached	Other kinds	Total
Average 1896-97 to 1900-01	8,700,997	321,672	9,022,669	2,576,912	114,698	2,691,610
„ 1901-02 to 1905-06	19,106,940	916,344	20,023,284	5,766,540	319,098	6,085,638
1906-07 to 1910-11	26,399,815	2,091,697	28,491,513	9,158,485	1,051,757	10,210,243
1911-12	31,556,766	2,651,766	34,208,532	11,923,976	2,591,073	14,515,049
1912-13	34,791,119	3,099,205	37,890,324	14,981,320	2,826,699	17,808,019

JUTE MILLS

[FOR TABLES, SEE PAGES 75 TO 77]

progress of
to mills

The record of the jute industry, as disclosed by these tables, may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for 1914-15 and 1915-16, and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100. It will be seen that the number of looms and spindles in operation have increased to a very much larger extent than either the number of mills at work or the amount of capital employed.

	Number of mills at work	Authorised capital (in lakhs of R)	Number (in thousands) of		
			Persons employed	Looms	Spindles
1879-80 to 1883-84 (average)	21 (100)	270.7 (100)	38.8 (100)	5.5 (100)	88 (100)
1884-85 to 1888-89	24 (114)	341.6 (126)	52.7 (136)	7 (127)	138.4 (157)
1889-90 to 1893-94	26 (124)	402.6 (149)	64.3 (166)	8.3 (151)	172.6 (196)
1894-95 to 1898-99	31 (149)	522.1 (193)	86.7 (223)	11.7 (213)	244.8 (278)
1899-1900 to 1903-04	36 (171)	680 (251)	114.2 (294)	16.2 (295)	334.6 (380)
1904-05 to 1908-09	46 (219)	960 (355)	165 (425)	24.8 (451)	510.5 (580)
1909-10 to 1913-14	60 (286)	1,200 (443)	203.4 (537)	33.5 (609)	691.8 (786)
1914-15	70 (333)	1,394.3 (515)	238.3 (614)	38.4 (698)	795.5 (904)
1915-16	70 (333)	1,336.6 (494)	254.1 (655)	39.9 (725)	812.4 (923)

production

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The combined value of gunny bags and gunny cloth exported by sea in 1915-16 is over thirty times as great as the average value of the exports in the period 1879-80 to 1883-84.

	Exports of Jute manufactures		
	Gunny bags in millions of number	Gunny cloths in millions of yards	Value in lakhs of R
1879-80 to 1883-84 (average)	54.9 (100)	4.4 (100)	124.9 (100)
1884-85 to 1888-89	77 (140)	15.4 (350)	162.9 (130)
1889-90 to 1893-94	111.5 (203)	41 (932)	289.3 (232)
1894-95 to 1898-99	171.2 (312)	182 (4,136)	518 (415)
1899-1900 to 1903-04	206.5 (376)	427.2 (9,709)	826.5 (662)
1904-05 to 1908-09	257.8 (469)	698 (15,864)	1,442.7 (1,154)
1909-10 to 1913-14	339.1 (618)	970 (22,045)	2,024.8 (1,621)
1914-15	397.6 (724)	1,057.3 (24,030)	2,582 (2,067)
1915-16	794.1 (1,447)	1,192.3 (27,098)	3,797.8 (3,041)

reports

Up to the last quinquennium the exports by sea of raw jute were marked by increases from year to year, although the improvement was not so rapid as in the case of manufactures. In 1914-15 and 1915-16 there was a decrease in exports as compared with the last quinquennium.

	Jute, raw, tons.
1879-80 to 1883-84 (average).	375,000 (100)
1884-85 to 1888-89	445,000 (119)
1889-90 to 1893-94	500,000 (133)
1894-95 to 1898-99	615,000 (164)
1899-1900 to 1903-04	635,000 (169)
1904-05 to 1908-09	755,000 (201)
1909-10 to 1913-14	765,000 (204)
1914-15	505,000 (135)
1915-16	600,000 (160)

prices

The price of raw jute reached its highest point in 1913-14, the rate being R76-12-0 per bale; in 1915-16 it dropped to R48-4-0. The following are the quinquennial average prices per bale (400 pounds) of ordinary jute and per 100 yards of gunny cloth, calculated from the prices current published by the Bengal Chamber of Commerce:—

	Price of raw jute ordinary, per bale of 400 lbs.			Price of Hessian cloth 10½ oz. 40" per 100 yds.		
	Rs.	a.	p.	Rs.	a.	p.
1879-80 to 1883-84 (average)	23	8	0 (100)	10	7	11 (100)
1884-85 to 1888-89	23	3	2 (99)	8	0	7 (77)
1889-90 to 1893-94	32	6	5 (138)	10	6	6 (99)

PAPER MILLS

[FOR TABLES, SEE PAGES 78 AND 79]

The number of paper mills in India in 1915 was eleven, three in Bengal, five in the Bombay Presidency (including one under liquidation), one in the United Provinces, one in the Travancore State, and one in the Gwalior State. The estimated authorised capital of these mills (excluding the one under liquidation) was about R50 lakhs. The value of the output reported rose from R82 lakhs in 1914 to R90 lakhs in 1915. Two of the mills, however, did not work in the year under review.

The competition of cheap wood-pulp paper imported from Europe has checked the development of paper-making by older methods in India, and the most successful mills are those which have Government contracts for the supply of cheap foolscap, blotting paper, notepaper, and envelopes. In 1911 the value of the paper manufactured in India and that of imported paper were R80 lakhs and R1,16 lakhs, respectively. In 1915 the corresponding figures were R90 lakhs and R1,34 lakhs, the value of the imports having increased in the meantime by 15½ per cent, and the internal production by 12½ per cent. The values of country-made and imported

	Produced in Indian mills R	Imported R
1911	80,04,000	1,16,12,000
1912	77,06,000	1,35,83,000
1913	80,37,000	1,59,00,000
1914	82,12,000	1,42,00,000
1915	90,62,000	1,34,00,000

paper during the last five years are given in the margin. Owing to the war and the resulting absence of competition from enemy countries, the Indian paper industry is comparatively prosperous, notwithstanding the increased cost of wood pulp and of chemicals required in the process of manufacture.

WOOLLEN MILLS

[FOR TABLES, SEE PAGES 80 AND 81]

Of the six woollen mills in India, one is in the Mysore State, and of the remaining five, three represent a paid-up capital of R77,50,000 (£316,667), while the capital of the other two, which are private mills at Calcutta and at Bombay, is not stated. Two of the mills, that is, the one at Cawnpore in the United Provinces, and the other at Dhariwal in the Punjab, have between them a paid-up capital of 71 lakhs (£473,333) or 92 per cent of the whole, and produce 65 per cent of the total outturn of the Indian mills. They weave cloth for the use of the army and the police, and articles of superior quality generally, using for the high class goods Australian wool either pure or mixed with Indian wool.

There was a decrease during the year under review in the number of looms as well as of spindles. In 1906 and 1907, owing to the high price of wool, there was a considerable shrinkage in production; since then there has been a steady increase, the statistics for 1915 surpassing all previous records. Up to 1914, the quantity of woollen goods imported into India was very much greater than the production of the Indian mills. In 1915, however, the order was reversed, and the production much exceeded the imports. Piece-goods and shawls, mostly from the United Kingdom, make up the bulk of the imports. The values of country-made and imported woollen goods compare as shown in the marginal table. There are in various places factories for the weaving of carpets and rugs, and of *pattu* and *pashmina*, but although these industries are in the aggregate extensive, they are individually small, and weaving is done by hand-looms.

The exports of woollen goods from India consist almost entirely of carpets and rugs, of which about three-fourths go to the United Kingdom and the greater part of the remainder to the United States. The value of Indian carpets and rugs exported during the last five calendar years is stated in the margin.

	R
1911	24,48,000
1912	22,62,000
1913	22,29,000
1914	18,18,000
1915	19,57,000

MINERAL PRODUCTION

[FOR TABLES, SEE PAGES 82 TO 87]

The minerals for which figures are recorded in these tables are those comprised in Group I of the mineral dealt with in the Records of the Geological Survey of India, that is, those minerals for which approximately accurate and full returns are obtainable.

Salt.—Statistics are supplied annually by all Local Governments and Administrations. Full details of the production and consumption of salt and the administration of the salt revenue are contained in Volume II (Financial) of the Statistics of British India.

Coal.—The figures are compiled chiefly from the statutory returns of the output furnished to the Chief Inspector of Mines in India by the Managing Agents of mines regulated by the Indian Mines Act, VIII of 1901. Figures for mines situated in Native States and for mines not coming within the operation of the Indian Mines Act are furnished by the Director, Geological Survey of India. Details regarding the coal mining industry in India are given separately in the next section relating to Coal Mines.

Gold.—The figures are supplied by the Director, Geological Survey of India. About 93 per cent of the total output of gold in 1915 was derived from the Kolar gold field in Mysore, the quantity won being

571,199 ounces, valued at Rs. 27,81,134. The production of this field reached its highest point in 1905 when 616,758 ounces were raised. The Anantapur mines in Madras come next, but at a respectable distance, to the Kolar gold field. The output in 1915 was 23,870 ounces, valued at Rs. 15,19,863, or 3.9 per cent of the total output of Indian gold. These mines gave their first output of gold during the year 1910, the amount being 2,332 ounces, valued at Rs. 1,51,800, and the output has steadily increased. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,851 ounces) having been obtained in the year 1898. The Nizam's mines at Hutti in Hyderabad closely follow the Anantapur mines, its yield in 1915 being 17,870 ounces, valued at Rs. 10,25,076. Other gold mines of minor importance exist in Bombay and Burma. The Dharwar mines in Bombay gave an output of 2,993 ounces in 1911 as compared with 737 ounces in 1910 and 5,616 ounces in 1909, but no output has been recorded since then. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell to 3,107 ounces in 1915, the dredging operations not having been so successful as had been hoped. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

Petroleum.—Figures of production are supplied by the Director, Geological Survey of India. Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important, and the most successful oil fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over a century, and in 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The output of the field rose to 10 million gallons in 1891, and to 40 million gallons in 1902. Since then progress has been more rapid, and the output reached a little over 200 million gallons in 1913, surpassing all previous records. In 1914, however, the output fell to about 175 million gallons, but again rose to about 199 million gallons in 1915. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. For some years progress was slow, but in 1903 the production reached 22 million gallons. Since then the output has decreased, and it was a little over 4 million gallons in 1915. Singu now holds the second place among the oil fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was about 43 million gallons, and, after a fall to 31½ million gallons in 1910, it rose to 77 million gallons in 1915. Several of the islands off the Arakan coast are known to contain oil deposits, but their value is uncertain. About 12,000 gallons were obtained from the Eastern Barongo Island near Akyab, and 23,000 gallons from Ramri Island in the Kyaukpyu district during 1915. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons, which increased in 1912 to a little under 4 million gallons but fell to 2½ million gallons in 1915. The existence of oil in Assam has been known for many years, and an oil spring was struck at Digboi near Makum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ million and 4½ million gallons.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. The total output of the province in 1911 was 1,400 gallons, and this figure fell to 950 gallons in 1912, showing a little rise in 1914 to 1,200 gallons. The output in 1915 amounted to 251,500 gallons. This remarkable increase was due to the discovery of a new field at Khaur, where borings were put down by the Attock Oil Company, and an output of ½ million gallons was obtained. In Baluchistan, geological conditions are adverse, and although some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

The consumption of kerosene in India (excluding Burma) is rapidly increasing and has risen from about 79 million gallons in 1900-01 to 172 million gallons in 1915-16. The enormous increase in the output of the Burma oil fields has reversed the position formerly held by foreign and Indian oil in the market. In 1908-09, however, the proportion of foreign oil consumed was a little higher than that of Burma oil as a result of a contraction in her shipments concurrently with a large increase in imports from foreign countries, but from 1909-10 Burma oil has regained its position.

Chromite.—The exploitation of the chromite deposits in Baluchistan, which were discovered by the Geological Survey of India in 1901, was begun in 1903. In 1906 the output amounted to 4,375 tons, which rose in 1907 to 7,274 tons, valued at Rs. 1,45,485, the highest on record, but fell to 2,161 tons, valued at Rs. 32,415, in 1915. At present the ore is raised entirely for export. The opening up of the Mysore chromite deposit commenced in 1907 with an initial output of 11,029 tons, valued at Rs. 2,20,580. The production in 1909 was 4,925 tons, valued at Rs. 29,550, but nothing was produced from 1910 to 1912 owing to the continuance of low prices. In 1913 the production was 1,414 tons, valued at Rs. 12,326, rising in 1914 to 2,330 tons, valued at Rs. 18,870, but falling again in 1915 to 1,041 tons, valued at Rs. 16,324. The year 1913 showed for the first time in the Singhbhum district (Bihar and Orissa), an output of 848 tons of chromite, valued at Rs. 7,784, but the output fell to 565 tons, valued at Rs. 4,223, in 1915.

Diamonds.—Diamonds are produced in the mines of the Vindhyan belt, which stretches through the Central Indian States of Panna, Charkhari, Ajaigarh, and Bijawar. The production in this field was 44 carats, valued at Rs. 7,133, in 1911, falling considerably in 1912 to 9 carats, valued at Rs. 997. In 1913 it showed an increase to 79 carats, valued at Rs. 26,536, but fell again in 1915 to 36 carats, valued at Rs. 9,044. In 1909, 111 carats were obtained from Banganapalli, Madras, but the production in 1911 was insignificant,

being 9 carats only. In 1913, 37 carats were obtained from the Karnul district, but in the following two years no output was recorded in the Madras Presidency.

Graphite.—Graphite occurs in the Travancore State under geological conditions similar to those of the richer deposits worked in Ceylon. The production in 1911 was 3,993 tons, the highest on record. Owing to the difficulties of working, the mine has been shut down since 1912. Some 54 tons of the mineral were obtained from the Vizagapatam mine in Madras in 1911, but no output has been recorded since 1912. Since the closing down of the Travancore mines attention has been paid to the graphite deposits in Bihar and Orissa and in Rajputana. At present the industry is only in its infancy, the total output of the year 1915 being 55 tons in Merwara (Rajputana) and 16 tons in Kalahandi (Bihar and Orissa).

Iron-ore.—The production of the Tata Iron and Steel Co.'s mines in Maunbhanj (Orissa) appeared in the statistics for the first time in 1911, the amount being 300,000 tons, valued at R3,00,000. The output rose in 1912 to 471,232 tons, valued at R4,71,232, but fell to 240,269 tons, valued at R2,40,268, in 1915. The Bengal Iron and Steel Works obtain their ores from Bengal and Chota Nagpur, the major portion of the output now coming from Singhbhum in Chota Nagpur. Elsewhere in India, namely, in the Central Provinces, the United Provinces, Madras, Central India, Hyderabad, Mysore, Rajputana, Burma, and the Punjab, operations are carried on, on a very small scale, for use in the small native furnaces. The value reported for the ore raised in Orissa, Chota Nagpur, and Bengal works out to an average of R1.1 per ton. Elsewhere the reported values are higher, about R4 per ton.

Jadestone.—The substance which passes as jadestone is mainly the mineral jadeite, which occurs in an altered igneous dyke in serpentine in the Myitkyina district of Upper Burma and also in the form of boulders in a tertiary conglomerate and in alluvium. It is worked in an unadministered tract, and there are no reliable figures of production. The figures given in the tables are those of the exports by sea from Rangoon, together with the exports overland to China.

Lead and Silver.—The smelting of lead slags and lead ore at Bawdwin by the Burma Mines, Ltd., resulted in a production in 1910 of 12,896 tons of lead and 49,680 ounces of silver worth R24,23,137 and R74,520, respectively. The output during 1915 amounted to 13,522 tons of lead and 284,875 ounces of silver, valued at R47,41,155 and R4,66,483, respectively. 512 ounces of silver were obtained in 1915 as a by-product in the extraction of gold at Anantapur in Madras by the Jibutli Gold Mines of Anantapur, Ltd.

Magnesite.—This mineral is worked in the Chalk Hills near Salem in the Madras Presidency. The output in 1913 was 14,086 tons, as against 15,379 tons in 1912. In the year 1913, this mineral is reported to have been worked also in Mysore with an output of 2,112 tons. In 1914 there was a very marked fall in the outturn in the Chalk Hills to 399 tons and in the Mysore State to 1,281 tons; there was, however, a considerable increase in the production of this mineral in the Salem district during 1915, the outturn being 7,450 tons, but nothing was produced in Mysore.

Manganese ore.—This industry commenced over twenty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing. In 1905 the production reached 247,427 tons; in the following year it was more than doubled (571,495 tons), and in 1907 the figures again rose to 902,291 tons. In 1909, on account of the fall in prices the output contracted to 644,660 tons, but it almost regained its former position in 1910 when the production rose to 800,907 tons. It fell again from 670,290 tons in 1911 to 633,080 tons in 1912, showing a rise again to 815,047 tons in 1913, which is the largest on record since 1908. The manganese-ore industry suffered from severe depression during the years 1914 and 1915, the output having fallen from 815,047 tons, valued at R1,81,65,515, in 1913, to 682,898 tons, valued at R1,31,58,965, in 1914, and 450,416 tons, valued at R1,39,43,187, in 1915, the apparent increase in value in 1915 being due to the abnormal conditions of the manganese market caused by the war.

The ore raised in the Central Provinces is of a very high grade, ranging from 49 to 54 per cent of the metal, and in consequence of its high quality is able to pay the heavy tax of freight over 500 miles of railway, besides the shipment charges to Europe and America, for the whole of the ore is exported to be used principally in steel manufacture in the United Kingdom, France, Italy, and the United States. The largest proportion of ore is raised in the Balaghat and the Nagpur districts, the Bhandara and the Chhindwara districts ranking next. Mining operations are also in progress in the Jhabua State in Central India, in the Panch Mahals in Bombay, in the Vizagapatam district in Madras, in the Mysore State, and in the Singhbhum district in Bihar and Orissa.

Mica.—The chief centres of production are the Nellore district in Madras, the Hazaribagh and Gaya districts of Bihar and Orissa, and certain States in Rajputana. Prospecting has been carried on in various districts of Madras, the Central Provinces, Upper Burma, and Assam, and in the Kishangarh State. The quantity of mica produced in 1915 was 27,140 cwts, as against 40,506 cwts in 1914. The mica industry has also been affected by the war.

Monazite.—This mineral has now taken an important place in the list of minerals of economic value produced in India. At present it is worked in Travancore by the London Cosmopolitan Mining Co. The output, which amounted in 1911 to 832 tons, valued at R3,60,660, rose to 1,235 tons, valued at R6,30,180, in 1913, but decreased to 1,108 tons, valued at R4,98,570, in 1915.

Platinum.—Eighteen ounces of this mineral valued at R1,493 were won in 1915, during the course of the gold dredging operations at Myitkyina in Burma, as against 37 ounces, valued at R3,195, in 1914.

Rubies.—The figures in the tables represent the quantity and value of the rubies raised by the Burma Ruby Mines, Ltd., in the Ruby Mines district of Upper Burma. There are no statistics available of the quantity and value of rubies raised by Indian miners in the district. Rubies are also found in the Mandalay and Myitkyina districts, but the production is on a very small scale. The large decrease in output and value in 1908 was

due to a slump in the ruby market, but there was a slight recovery from 1909 to 1912. In 1915 the output of this mineral decreased again and amounted to 251,449 carats, valued at Rs.44,477.

Saltpetre (Nitrate of Potash).—This article is largely produced for export. It is largely produced in the United Provinces and Bihar, whence the article is sent to Calcutta for export after refinement. The production of saltpetre was 369,113 cwts in 1915, as against 316,211 cwts in 1914. The demand for saltpetre for the manufacture of explosives has given a considerable impetus to the industry.

Tin-ore.—Tin-washing is carried on in the Tenasserim Peninsula, and also in the Bawlake State of Karenni, chiefly by Chinese immigrants in an uncertain and unsystematic way. The production of tin-ore in 1911 was 1,943 cwts, rising to 8,629 cwts in 1915.

Wolfram (Tungsten ore).—The great activity displayed in prospecting for wolfram in Tavoy and to a lesser extent in Mergui in Burma resulted in the output of 396 tons in 1910, rising to 2,645 tons, valued at Rs.44,51,592, in 1915. The demand for the manufacture of high-speed steel gave an impetus to the wolfram industry of Tavoy towards the latter part of 1915.

Zinc-ore.—The ore is found in association with galena in the Bawdwin mines in Burma, large ore-bodies being composed of the latter mineral and zinc-blende. In 1914, 8,553 tons of zinc-ore, valued at Rs.1,61,430, were produced, as against 3,871 tons, valued at Rs.73,065, in 1913. In 1915 the output fell considerably to only 87 tons, valued at Rs.2,610.

COAL MINES

[FOR TABLES, SEE PAGES 88 TO 91]

All returns of production in the case of mines under the Indian Mines Act, VIII of 1901, are sent direct by the Managing Agents of mines to the Chief Inspector of Mines, who forwards them to this Department. The Director, Geological Survey of India, supplements them by the returns sent to him by Local Governments and Political Agents for non-Act and Native States mines. Information regarding the imports and exports of coal has been taken from the Scaborn and Railborne Trade Returns published by this Department. As regards consumption of coal, estimates have been made from data furnished by the Railway Board, the Steamer Companies, the Port Trusts, mills and factory owners.

The quantity of coal produced in each province in India from 1878 to 1915 is stated in table No. 29. Although coal-mining has been now practised in India for more than a century and although production and consumption have shown a steady increase, which has been especially notable in the last decade, the development of the coal resources of the country is as yet very incomplete.

The total production in 1915 amounted to 17,104,000 tons or about 3.9 per cent more than was produced in the previous year. To this may be added some 342,000 tons estimated to have been taken out from the mines by miners for their own use. The total production in 1915 would thus come to some 17,446,000 tons, but for purposes of comparison the figure (17,104,000 tons) first stated should be adopted.

The year was remarkably one of large increase or decrease as far as the coal-fields of Bengal and of Bihar and Orissa are concerned. The output of the larger firms and of those working the best seams increased, while those of the smaller owners and of those working inferior coals decreased. In the Raniganj field, which almost entirely accounted for the total increase, the increase was over 800,000 tons and the decrease over 300,000 tons, resulting in a net increase of over half a million tons. The total output of the Jherria field was stationary, but the increase and decrease, which practically balanced each other, were each over a million tons. In the year under review the increase of output kept pace with the demand. Reduction in finance facilities, the closing down of much internal industry, and the restriction of commerce forced a good deal of extra coal on the market early in the year and brought down prices. This reacted on the industry generally throughout the year and affected especially the small owners and those working inferior coals.

The coal-fields which have been worked in recent years are classified below, with the quantity produced in 1915, according as they belong geologically to the Gondwana system of strata, chiefly composed of sandstones and shales deposited in fresh water and by rivers, or to Tertiary (or Cretaceous) beds:—

	1915 tons	Per cent of total		1915 tons	Per cent of total
GONDWANA COAL-FIELDS—			TERTIARY COAL-FIELDS—		
<i>Bengal and Bihar and Orissa—</i>			<i>Baluchistan—</i>		
Daltonganj	85,800	50	Khost	35,800	21
Girdih	872,600	5.10	Sor Range, Mach, etc.	7,800	05
Jherria	9,140,800	53.44	<i>Assam—</i>		
Jainty	40,700	24	Makum, etc.	311,300	1.82
Ramgarh-Bokaro	10,200	06	<i>Burma—</i>		
Raniganj	5,484,000	32.07	Bhamo	25	..
Sambalpur	58,800	34	<i>North-West Frontier Province—</i>		
<i>Central India—</i>			Hazara	100	..
Umaria (Rewah)	139,700	82	<i>Punjab (Salt Range)—</i>		
<i>Central Provinces—</i>			Jhelum District	51,600	} 34
Mohpani	55,100	32	Mianwali District	2,000	
Pench Valley	103,200	60	Shahpur District	4,300	
Wardha Valley (Ballarpur, Chanda)	94,900	56	<i>Rajputana—</i>		
<i>Hyderabad—</i>			Bikaner	17,800	10
Singareni	586,800	3.43	TOTAL		
TOTAL	16,673,200	97.48	TOTAL	430,700	2.52

About 97.5 per cent of the coal supplies of India is obtained from the Gondwana coal-fields and 2.5 per cent from Tertiary beds.

The Raniganj field and the Jherria field are in the Damuda Valley and produce 85·5 per cent of the total output. The Raniganj field (where the first Indian coal mine was opened in 1820) held the first place as regards production up to 1905, but now stands second, its yield in 1915 having been 5,485,000 tons or 32 per cent of the year's total production. It covers an area of about 500 square miles, mostly within the district of Burdwan (Bengal), but stretching also across the boundaries into Bankura (Bengal), Manbhum, and the Santhal Parganas (Bihar and Orissa). The Jherria field in Bihar and Orissa, which was opened in 1893, went ahead of the Raniganj field in 1906, and it has succeeded in maintaining the lead since that date, the output in 1915 being 9,141,000 tons (that is, 53 per cent of the total production). Of the remaining fields in Bihar and Orissa, the Giridih field, a small isolated patch to the north of the Damuda Valley, produced, in 1915, 873,000 tons or 5 per cent of the total. The Daltonganj field, further west in the Palamau district, was opened in 1901; it yielded, in 1915, 86,000 tons. The quantity so far obtained from the remaining three fields has been limited. In the Rajmahal coal-field, work has been discontinued, but a new field has recently been opened at Jainty, near Giridih, which produced 40,700 tons in 1915. In the Ramgarh-Bokaro field, lying immediately to the west of Jherria in the Damuda Valley, mining was begun in 1908, and its yield in 1910 was 2,200 tons, rising to 10,000 tons in the year under review. The Sambalpur field was opened for the first time in 1909, and its production rose from 800 tons in 1911 to 59,000 tons in 1915. These seven coal-fields accounted for 91·8 per cent of the coal raised in India in 1915. Owing to the wide extent of these fields, the fair quality of coal which they contain, and their comparative nearness to the sea-coast, this proportion is not likely to decrease materially in the near future.

Outside Bengal and Bihar and Orissa, the most important mine is the Singareni near Yellunda in the Nizam's dominions. Work was begun at Singareni in 1887, and progress has been more rapid than in any other place outside Bengal and Bihar and Orissa, the average annual production during the last ten years having been some 496,000 tons. Its output in 1915 was 587,000 tons. The Umaria mine in the Rewah State in Central India was started in 1884. Its progress was steady up to the year 1903, when the maximum production of 193,300 tons was reached; since then there has been a retrogression and the output in 1915 was 139,700 tons. In the Central Provinces, the Ballarpur mine in the Chanda district was opened in 1904 to take the place of the Warora Colliery, which was closed down in 1906, and the work of extracting coal began seriously in 1908. The output that year was 45,000 tons; in 1915 it rose to 94,000 tons. The Mohpani and Pench Valley fields lie respectively at the northern and southern fringes of the Satpura range. The former is situated in the Narsingpur district in the south of the Nerbudda alluvial valley. The old mine was opened in 1860 and was abandoned in 1902 after all the available coal—some 460,000 tons in the aggregate—had been raised from it. The new Mohpani mine has been worked by the Great Indian Peninsula Railway Company since 1904, and its output was, in 1915, 55,000 tons. The Pench Valley field in the Chhindwara district was opened in 1905; its yield rose from 1,100 tons in 1905 to 103,000 tons in 1915.

Next with reference to Tertiary or cretaceous coal-beds. The most important of these are in north-east Assam, where the Makum coal-fields have been worked since 1882, and the coal obtained therefrom has a remarkably low percentage of ash and a high calorific value. The output was 311,000 tons in 1915. Next in rank of importance come the Salt Range mines of the Punjab and the Khost mines on the Sind-Pishin Railway in Baluchistan; both have been worked now for twenty-nine years, but their production in 1915 was only 57,900 tons and 35,800 tons, respectively. The coal produced at Palana in the Bikaner State is really a dark brown lignite, and its production during recent years has been restricted in consequence of special precautions necessary to prevent underground fires. Its production in 1915 was 17,800 tons in comparison with 17,200 tons in the previous year.

The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth and is necessarily dependent upon the relation between local supply and demand, not indicative of the actual value of the fuel: Bengal coal, for instance, which is all-round the best quality worked in India, is returned as having a lower value than the coal worked in other provinces, where higher prices can be safely demanded by the miner. The average value, as thus defined, of all the coal produced in each province in India in each of the last fifteen years is given in table No. 30. In 1915 the average value was R3·5 per ton. The lowest value, namely, R2·8 per ton, was that of 1905, and the highest (R3·15) that in the boom of 1908, when demand kept ahead of supply.

		AVERAGE VALUE OF COAL	
		Declared export value per ton	Value at the pit's mouth per ton
		R a.	R a.
1911	.	8 7	2 15
1912	.	10 1	3 6
1913	.	9 13	3 8
1914	.	8 13	3 9
1915	.	9 3	3 5

The marginal table compares the average value at the pit's mouth of Indian coal with the declared export value per ton in each of the last five years. The declared export value is more than 2½ times the value at the pit's mouth. The total estimated value of the output in 1915 was R5,67 lakhs as against R5,86 lakhs in 1914.

With the above average value may be compared the values at the pit's mouth of coal in foreign countries as shown in the margin (the figures represent the average of the five years ending 1913, later quotations not being available). In comparing the average value of the coal raised in different countries, it must be remembered that this value is affected by many circumstances, such as the quality of the coal, its accessibility, the machinery in use, nearness to the surface, etc., besides the differences in the cost of labour and transport. In India, the coal now being worked is comparatively near the surface, and labour may be said to be cheap: Indian coal

due to a slump in the ruby market, but there was a slight recovery from 1909 to 1912. In 1915 the output of this mineral decreased again and amounted to 251,449 carats, valued at R5,44,477.

Saltpetre (Nitrate of Potash).—This article is largely produced for export. It is largely produced in the United Provinces and Bihar, whence the article is sent to Calcutta for export after refinement. The production of saltpetre was 369,113 cwts in 1915, as against 316,211 cwts in 1914. The demand for saltpetre for the manufacture of explosives has given a considerable impetus to the industry.

Tin-ore.—Tin-washing is carried on in the Tenasserim Peninsula, and also in the Bawlake State of Karenni, chiefly by Chinese immigrants in an uncertain and unsystematic way. The production of tin-ore in 1911 was 1,943 cwts, rising to 8,629 cwts in 1915.

Wolfram (Tungsten ore).—The great activity displayed in prospecting for wolfram in Tavoy and to a lesser extent in Mergui in Burma resulted in the output of 396 tons in 1910, rising to 2,645 tons, valued at R44,51,592, in 1915. The demand for the manufacture of high-speed steel gave an impetus to the wolfram industry of Tavoy towards the latter part of 1915.

Zinc-ore.—The ore is found in association with galena in the Bawdwin mines in Burma, large ore-bodies being composed of the latter mineral and zinc-blende. In 1914, 8,553 tons of zinc-ore, valued at R1,61,430, were produced, as against 3,871 tons, valued at R73,065, in 1913. In 1915 the output fell considerably to only 87 tons, valued at R2,610.

COAL MINES

[FOR TABLES, SEE PAGES 88 TO 91]

All returns of production in the case of mines under the Indian Mines Act, VIII of 1901, are sent direct by the Managing Agents of mines to the Chief Inspector of Mines, who forwards them to this Department. The Director, Geological Survey of India, supplements them by the returns sent to him by Local Governments and Political Agents for non-Act and Native States mines. Information regarding the imports and exports of coal has been taken from the Scaborne and Railborne Trade Returns published by this Department. As regards consumption of coal, estimates have been made from data furnished by the Railway Board, the Steamer Companies, the Port Trusts, mills and factory owners.

Production

The quantity of coal produced in each province in India from 1878 to 1915 is stated in table No. 29. Although coal-mining has been now practised in India for more than a century and although production and consumption have shown a steady increase, which has been especially notable in the last decade, the development of the coal resources of the country is as yet very incomplete.

The total production in 1915 amounted to 17,104,000 tons or about 3·9 per cent more than was produced in the previous year. To this may be added some 342,000 tons estimated to have been taken out from the mines by miners for their own use. The total production in 1915 would thus come to some 17,446,000 tons, but for purposes of comparison the figure (17,104,000 tons) first stated should be adopted.

The year was remarkably one of large increase or decrease as far as the coal-fields of Bengal and of Bihar and Orissa are concerned. The output of the larger firms and of those working the best seams increased, while those of the smaller owners and of those working inferior coals decreased. In the Raniganj field, which almost entirely accounted for the total increase, the increase was over 800,000 tons and the decrease over 300,000 tons, resulting in a net increase of over half a million tons. The total output of the Jherria field was stationary, but the increase and decrease, which practically balanced each other, were each over a million tons. In the year under review the increase of output kept pace with the demand. Reduction in finance facilities, the closing down of much internal industry, and the restriction of commerce forced a good deal of extra coal on the market early in the year and brought down prices. This reacted on the industry generally throughout the year and affected especially the small owners and those working inferior coals.

Coal fields

The coal-fields which have been worked in recent years are classified below, with the quantity produced in 1915, according as they belong geologically to the Gondwana system of strata, chiefly composed of sandstones and shales deposited in fresh water and by rivers, or to Tertiary (or Cretaceous) beds:—

GONDWANA COAL-FIELDS—	1915 tons	Per cent of total	TERTIARY COAL-FIELDS—	1915 tons	Per cent of total
<i>Bengal and Bihar and Orissa—</i>			<i>Baluchistan—</i>		
Daltonganj	85,800	·50	Khost	35,800	·21
Girdih	872,600	5 10	Sor Range, Mach, etc.	7,800	·05
Jherria	9,140,800	53 44	<i>Assam—</i>		
Jainty	40,700	·24	Mahum, etc.	311,300	1·82
Ramgarh-Bokaro	10,200	·06	<i>Burma—</i>		
Ranganj	5,484,000	32 07	Bhamo	25	..
Sambalpur	58,800	·34	<i>North-West Frontier Province—</i>		
<i>Central India—</i>			Hazara	100	..
Umaria (Rewah)	139,700	·82	<i>Punjab (Salt Range)—</i>		
<i>Central Provinces—</i>			Jhelum District	51,600	} ·34
Mohpani	55,100	·32	Mianwali District	2,000	
Pench Valley	103,200	·60	Shahpur District	4,300	
Wardha Valley (Ballarpur, Chanda)	94,900	·56	<i>Rajputana—</i>		
<i>Hyderabad—</i>			Bikaner	17,800	·10
Singareni	586,800	3·43			
TOTAL	16,673,200	97 48	TOTAL	430,700	2·52

About 97·5 per cent of the coal supplies of India is obtained from the Gondwana coal-fields and 2·5 per cent from Tertiary beds.

The Raniganj field and the Jherria field are in the Damuda Valley and produce 85·5 per cent of the total output. The Raniganj field (where the first Indian coal mine was opened in 1820) held the first place as regards production up to 1905, but now stands second, its yield in 1915 having been 5,485,000 tons or 32 per cent of the year's total production. It covers an area of about 500 square miles, mostly within the district of Burdwan (Bengal), but stretching also across the boundaries into Bankura (Bengal), Manbhum, and the Santhal Parganas (Bihar and Orissa). The Jherria field in Bihar and Orissa, which was opened in 1893, went ahead of the Raniganj field in 1906, and it has succeeded in maintaining the lead since that date, the output in 1915 being 9,141,000 tons (that is, 53 per cent of the total production). Of the remaining fields in Bihar and Orissa, the Giridih field, a small isolated patch to the north of the Damuda Valley, produced, in 1915, 873,000 tons or 5 per cent of the total. The Daltonganj field, further west in the Palamau district, was opened in 1901; it yielded, in 1915, 86,000 tons. The quantity so far obtained from the remaining three fields has been limited. In the Rajmahal coal-field, work has been discontinued, but a new field has recently been opened at Jainty, near Giridih, which produced 40,700 tons in 1915. In the Ramgarh-Bokaro field, lying immediately to the west of Jherria in the Damuda Valley, mining was begun in 1908, and its yield in 1910 was 2,200 tons, rising to 10,000 tons in the year under review. The Sambalpur field was opened for the first time in 1909, and its production rose from 800 tons in 1911 to 59,000 tons in 1915. These seven coal-fields accounted for 91·8 per cent of the coal raised in India in 1915. Owing to the wide extent of these fields, the fair quality of coal which they contain, and their comparative nearness to the sea-coast, this proportion is not likely to decrease materially in the near future.

Outside Bengal and Bihar and Orissa, the most important mine is the Singareni near Yellunda in the Nizam's dominions. Work was begun at Singareni in 1887, and progress has been more rapid than in any other place outside Bengal and Bihar and Orissa, the average annual production during the last ten years having been some 496,000 tons. Its output in 1915 was 587,000 tons. The Umaria mine in the Revah State in Central India was started in 1884. Its progress was steady up to the year 1903, when the maximum production of 193,300 tons was reached; since then there has been a retrogression and the output in 1915 was 139,700 tons. In the Central Provinces, the Ballarpur mine in the Chanda district was opened in 1904 to take the place of the Warora Colliery, which was closed down in 1906, and the work of extracting coal began seriously in 1908. The output that year was 45,000 tons; in 1915 it rose to 94,000 tons. The Mohpani and Pench Valley fields lie respectively at the northern and southern fringes of the Satpura range. The former is situated in the Narsingpur district in the south of the Nerbudda alluvial valley. The old mine was opened in 1860 and was abandoned in 1902 after all the available coal—some 460,000 tons in the aggregate—had been raised from it. The new Mohpani mine has been worked by the Great Indian Peninsula Railway Company since 1904, and its output was, in 1915, 55,000 tons. The Pench Valley field in the Chhindwara district was opened in 1905; its yield rose from 1,100 tons in 1905 to 103,000 tons in 1915.

Next with reference to Tertiary or cretaceous coal-beds. The most important of these are in north-east Assam, where the Makum coal-fields have been worked since 1882, and the coal obtained therefrom has a remarkably low percentage of ash and a high calorific value. The output was 311,000 tons in 1915. Next in rank of importance come the Salt Range mines of the Punjab and the Khost mines on the Sind-Pishin Railway in Baluchistan; both have been worked now for twenty-nine years, but their production in 1915 was only 57,900 tons and 35,800 tons, respectively. The coal produced at Palana in the Bikaner State is really a dark brown lignite, and its production during recent years has been restricted in consequence of special precautions necessary to prevent underground fires. Its production in 1915 was 17,800 tons in comparison with 17,200 tons in the previous year.

The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth and is necessarily dependent upon the relation between local supply and demand, not indicative of the actual value of the fuel: Bengal coal, for instance, which is all round the best quality worked in India, is returned as having a lower value than the coal worked in other provinces, where higher prices can be safely demanded by the miner. The average value, as thus defined, of all the coal produced in each province in India in each of the last fifteen years is given in table No. 30. In 1915 the average value was R3·5 per ton. The lowest value, namely, R2·8 per ton, was that of 1905, and the highest (R3·15) that in the boom of 1908, when demand kept ahead of supply.

	AVERAGE VALUE OF COAL	
	Declared export value per ton	Value at the pit's mouth per ton
	R a.	R a.
1911	8 7	2 15
1912	10 1	3 6
1913	9 13	3 8
1914	8 13	3 9
1915	9 3	3 5

The marginal table compares the average value at the pit's mouth of Indian coal with the declared export value per ton in each of the last five years. The declared export value is more than 2½ times the value at the pit's mouth. The total estimated value of the output in 1915 was R5,67 lakhs as against R5,86 lakhs in 1914.

With the above average value may be compared the values at the pit's mouth of coal in foreign countries as shown in the margin (the figures represent the average of the five years ending 1913, later quotations not being available). In comparing the average value of the coal raised in different countries, it must be remembered that this value is affected by many circumstances, such as the quality of the coal, its accessibility, the machinery in use, nearness to the surface, etc., besides the differences in the cost of labour and transport. In India, the coal now being worked is comparatively near the surface, and labour may be said to be cheap: Indian coal

United States of America	4 7 2
South Africa	4 3 2
India	3 4 5

(a) Average of the five years ending 1912, later quotation not being available

therefore, has a lower value at the pit's mouth than the coal of any other country. After India, the value is lowest in South Africa and in the United States. Of the principal coal-producing countries in Europe, the United Kingdom has the lowest average value at the pit's mouth; and South Africa has the lowest average value of all places in the British Empire except India.

The cost per ton of production in India varies considerably in the different coal-fields. The variation in the Raniganj field is from R1-14 to R2-8 and in the Jherria field from R1-8 to R2. In the Giridih field the cost per ton is stated to be about R2-4 per ton. In the fields of Central India and the Central Provinces the rate varies from R2-8 to R5-10 per ton, whilst in the Punjab very much higher rates prevail.

The comparative average prices per ton of Bengal coal at Calcutta and of Indian and Welsh coal at Bombay and Karachi since 1901 are shown in table No. 31. The figures are taken in the case of Bombay from the *Bombay Market Report* and in the case of Calcutta and Karachi from the *Prices Current* of the respective Chambers of Commerce. In 1913 there was a general rise in prices of both Indian and Welsh coal at all the three ports mentioned above. In 1914 prices of Indian coal rose further at Calcutta, but those at Bombay and Karachi for both Indian and Welsh coal fell. In 1915 and in the first six months of 1916, the prices of Indian coal at Calcutta fell, while those at Bombay and Karachi for both Indian and Welsh coal rose considerably.

In order to get an idea of the comparative prices of Bengal coal in the principal centres of industry in India, the freight has to be added to the f.o.r. prices. The marginal table shows the freight per ton of coal by rail for full wagon loads at owners' risk (owners to load and unload) from the Raniganj and Jherria fields in 1915. It is interesting to note that the transport of coal forms an important item in the earnings of the Railway Companies, especially the East Indian and the Bengal-Nagpur systems, which serve the Raniganj, Jherria, Giridih, and Daltonganj fields.

The average freight per ton of coal by sea from Calcutta during 1915 was as stated in the margin. The rates were much higher than in 1914. The year was a phenomenal one owing to the war, and a shortage of tonnage was acute. A considerable business was done to Rangoon, although freight rates to Rangoon rose from R4 in January to R9-8 in March and April.

Table No. 32 shows the total number of men, women, and children employed in coal mines in India during each of the last fifteen years. This number represents the "average daily attendance" throughout the year, and is obtained by dividing the total number of attendances by the number of working days in each year. Coal-mining employs more labour than any other mining industry, and will probably continue to do so for many years. In 1915, 160,086 persons were employed as against 151,376 in 1914, or an increase of 8,710 persons or 6 per cent. Details for the provinces are given below:—

	Men	Women	Children	Total	Per cent of total
Bihar and Orissa	57,857	35,382	2,053	95,292	59.5
Bengal	26,692	14,796	603	42,093	26.3
Hyderabad	8,977	2,325	..	11,302	7.1
Central Provinces	2,344	768	72	3,184	2
Assam	2,331	530	48	2,909	1.8
Central India	2,384	500	..	2,884	1.8
Baluchistan	943	..	20	963	.6
Punjab	1,241	1	31	1,273	.8
Rajputana (Bikaner)	145	16	..	161	.1
North-West Frontier Province	9	9	..
Burma	16	16	..
TOTAL	102,939	54,318	2,823	160,086	100

Of the increase in the year under review, the coal-fields of Bihar and Orissa accounted for 4,437 persons. The labour supply in the Raniganj field was reported to be unusually plentiful, owing chiefly to a bad harvest in the previous year. In the Bankura district the scarcity amounted to a famine and labour flocked to the coal mines in large numbers. There were, however, in this coal-field outlying mines, where more labour would have been welcomed. In the Jherria field also, the year was considered to be a good one generally.

The great proportion of those employed are the aboriginal Dravidians from the mountainous country of Chota Nagpur and the Central Provinces, but a large number of other castes is also employed, particularly in the outlying fields. The majority of the workmen follow the vocation of agriculture as well as mining, and return

to their homes during the periods of sowing and reaping, the result being that, at such times, the output of many of the mines is greatly restricted. At the Makum collieries of the Assam Railway and Trading Co., where the labour question continues to be a very difficult one, nearly a third of the total labour force are Mekranis, Chinese, and Nepalese. The Chinese have proved unsatisfactory and it is not proposed to recruit any more of them.

The output of coal in India in 1915 per person employed is compared in the marginal statement with the results of the immediately preceding four years. The

	Above and below ground Tons	Below ground only Tons
1911	109.5	166.7
1912	110.9	170.4
1913	111.8	172.2
1914	108.7	166.7
1915	106.8	160.2

Indian miner is still to some extent a miner by caprice, and, as stated above, in a year of agricultural prosperity the scarcity of labour is much felt. Epidemics of cholera and other diseases are not infrequent and cause a shortage of labour. As the workings get deeper, the need of a mining population, which specialises in mining, will become greater. There has been a great advance in the use of electricity in the coal mines of Bengal and Bihar for haulage, pumping, lighting, and ventilation. There is, however, little or no coal-cutting by machinery.

During the time of high prices which prevailed round and about 1908, owners strove to put out more and more coal, even at an increased cost. The labour supply was found soon to be inadequate, and a number of owners put down and carried on successfully coal-cutting plants, although at a somewhat high cost. As prices dropped and labour conditions became easier, the cost of production by the machines became relatively too high, and they were discarded. Occasionally a plant is put down for the purpose of making long connections underground rapidly. As long as labour conditions remain as they are, there will not be much headway in the introduction of mechanical coal-cutters.

The quantities of foreign coal imported into British India from the principal countries during the last twenty-five years are given in table No. 33. For the first fifteen years quinquennial averages only have been given. The figures represent private merchandise only and do not include Government stores, the imports of which amounted to 12,400 tons in 1915, as against 54,700 tons in 1914, 212,900 tons in 1913, and 50,900 tons in 1912. The greatest quantity imported in any one year of the series was some 820,000 tons, valued at Rs. 1,47,00,000, in the year 1894. The statistics for succeeding years are marked by considerable fluctuations. The largest quantity imported in recent years was in 1913, when 645,000 tons, valued at Rs. 1,22,00,000, were imported. In 1914 the imports declined by 226,000 tons or 35 per cent to 419,000 tons. In 1915 they fell to 191,000 tons, or a decrease of 54 per cent as compared with the previous year. Owing to the difficulty of bringing out coal on account of the war and the consequent abnormal prices, the year under review recorded the lowest import since 1904. Bombay has naturally been the largest importer and Burma the second. The United Kingdom has always supplied by far the greatest part of the imported coal, but in 1915 the coal industry in that country was most adversely affected by the war and the largest quantity came from the Portuguese East Africa. On the average of the twenty-five years of the series, Australia holds the second place, and Japan the third with shares of 25,000 tons and 21,000 tons, respectively. The United Kingdom sent to India 47,000 tons in 1915 as against 167,000 tons in the previous year. The arrivals from Japan were very small this year, namely 18,100 tons, as against 32,200 tons in the previous year. The imports from Natal were insignificant until 1907, the largest quantity imported being 136,700 tons in 1913. Natal's share in 1915 was 15,300 tons. The imports from Australia, which in 1912 amounted to 92,000 tons, declined to 28,100 tons in 1915. The other countries from which coal is now imported into India in considerable quantities are the Portuguese East Africa and the Transvaal. In 1915 the imports from the Portuguese East Africa amounted to 52,300 tons and from the Transvaal to 26,400 tons, as against 58,700 tons and 40,400 tons, respectively, in 1914.

The provincial share of imported coal was Bombay (78 per cent), Burma (16 per cent), Madras (5 per cent), and Sind (1 per cent). A very small quantity (220 tons) was imported into Bengal.

The total quantity of Indian coal exported from British India during the last twenty-five years and the share taken by each of the principal importing countries are shown in table No. 34. As in the case of statistics of imports, quinquennial averages only are given for the first fifteen years. Bunker coal is not included in this statement, which relates only to coal shipped as private merchandise to foreign ports. The exports rose in proportion to the expansion in production up to the year 1906; since then there was a progressive decline in the ratio up to 1909. This decline was arrested in 1910, but there was again a contraction in the following four years. On the average of the seven years 1900 to 1906, the exports were 8 per cent of the total production of Indian coal, as against 6 per cent on the average of the succeeding seven years 1907 to 1913. In 1914 the ratio was 3.5 per cent and in 1915 4.4 per cent. That is to say, exports in 1915 were in the proportion of one ton only to about 23 tons produced. The bulk of the production is thus consumed in the country. Almost all the coal shipped as private merchandise from India is sent from Calcutta. Ceylon and the Straits Settlements are the two principal markets for Indian coal, and of the total quantity shipped in 1915, 73.7 per cent was declared for Ceylon and 13.2 per cent for the Straits. Sumatra takes more coal from India than formerly and is now India's third best customer (8.5 per cent). From 1902 to 1906 the total exports abroad increased rapidly till they reached 1,003,000 tons in 1906. In 1907 there was a decline to 658,000 tons, which was ascribed to increased industrial activity in India itself; and the shipments in subsequent years were marked by fluctuations until 1910, when there was a sharp rise to 988,000 tons, the increase being one of 424,000 tons or 75 per cent. In 1914 the shipments fell to 580,000 tons, but in 1915 they rose to 753,000 tons, or by 30 per cent. On the whole, the exports from 1907 have not shown that expansion which might have been anticipated, owing to the uncertain quality of the coal exported, high freights, and the primitive methods of shipment at the Calcutta docks, resulting in heavy depreciation of coal. In 1914 and 1915 the exports were especially handicapped by high ocean freight rates consequent on the very great shortage of tonnage due to the war.

Owing to the war Indian coal is being used in and outside India in place of British and other imported fuel. There is accordingly a good opportunity for permanently displacing this competition by supplying good coal according to description. This would in time doubtless greatly increase the exports to Colombo, the Straits, Sumatra, and other consuming markets outside India.

Distribution In table No. 35 is shown the total available supply of coal in India, which is arrived at by adding imports to the total production and subtracting exports therefrom; in 1915 the figure stood at 16,541,000 tons, as compared with 16,303,000 tons in 1914 and 12,172,000 tons five years ago. From this figure the consumption of coal per head of population comes to .051 ton or about one cwt a year.

Tables Nos. 36 and 37 give the distribution of coal production in the country and coal imported from abroad, and of the agencies by which it is distributed. Calcutta uses Bengal and Bihar and Orissa coal almost exclusively. The province of Bihar and Orissa is self-supporting, although it takes a small quantity of Bengal coal. Bombay city derives its supplies by sea from Bengal and from foreign countries in the proportion of 2 to 1, partly for its own consumption and partly for diffusion throughout the Bombay Presidency, which also receives considerable quantities by rail from Bengal, Bihar and Orissa, and Hyderabad. Sind and Madras import most of their coal coastwise from Bengal, but also draw part of their supply from Bihar and Orissa and Hyderabad. Assam, the United Provinces, the Punjab, the Central Provinces, Rajputana, and Central India import the bulk of the coal they require by rail and river from Bihar and Orissa and Bengal. Most of the coal consumed in Mysore comes mainly from the Hyderabad and Bihar and Orissa mines. Burma gets its supply almost wholly from Bengal and Bihar and Orissa.

Consumption The supply available in the cities of Calcutta and Bombay and in each province is given in table No. 38. The quantity available in Calcutta in the year under review was 2½ million tons, while that in the city of Bombay was only 980,000 tons.

The statement in the margin gives an estimate of the coal consumed during 1915 in the various industries, etc., but the figures can only be regarded as approximate, and in the case of some of the heads they represent a very rough estimate. Roughly one-third of the total quantity of coal produced in India is consumed by railways (including railway workshops).

	Estimated consumption Tons	Per cent of total
Railways (including railway work-shops)	5,167,000(a)	31·4
Port Trusts	160,000	1·0
Bunker coal	888,000	5·2
Inland steamers	619,000	3·7
Jute mills	886,000	5·4
Cotton mills	1,121,000	6·8
Iron and brass foundries	1,332,000	8·1
Tea gardens	165,000	1·0
Brick and tile manufacture	1,197,000	7·2
Consumption at collieries and waste- age	1,710,000	10·3
Other forms of industrial and domestic consumption	3,206,000	19·9
TOTAL	16,541,000	100

represented 99 per cent. The railway consumption of Indian coal averaged 33 per cent of the total quantity of coal produced in India in the ten years ending 1899, 30 per cent in the ten years ending 1909, 29 per cent in 1913-14, and 30 per cent in 1914-15 and in 1915-16. The consumption of wood as fuel on railways has not decreased to such an extent as might have been expected during this period, still the decrease has been fairly progressive. In 1915-16, however, the quantity used was 112,700 tons as compared with 95,600 tons in 1911-15. This amount may be regarded as equivalent to 45,100 tons of coal, reckoning 2½ tons

	Total mileage of railways	Total con- sumption in tons	Consumption per mile in tons
India (a)	35,833	5,186,705	145
United Kingdom (b)	23,441	12,636,173	539
Russia in Europe (c)	34,760	5,318,000(c)	154
Japan (c)	7,078	1,871,422	264

of wood as equal to 1 ton of coal. Wood is still used largely on the Madras and Southern Mahratta, the Burma, the North-Western, and the South Indian Railways. The consumption of coal in relation to the total mileage of Indian railways is compared with that of certain foreign countries in the marginal statement.

Bunker coal.*—The shipments of bunker coal from Calcutta for use in steamers are, as is to be expected, far in excess of those of any other port. They increased steadily up to 1908, but in 1909 there was a set-back, the figures being 888,500 tons as against 1,058,300 tons in the preceding year. In 1910 the shipments amounted to 904,700 tons, but in 1911 they fell to 883,000 tons, rising again to 964,000 tons in 1912 and to 1,019,000 tons in 1914, but fell to 768,000 tons in 1915. For the other ports exact figures have not been recorded. Indian coal is consumed on steamers of almost all the lines that touch at Indian ports. In some cases it is mixed with Welsh coal, but more often it is used unmixed.

Inland steamers.—The total reported figure comes to about 569,000 tons a year; but there are many smaller companies and steamers in Bengal, Assam, and Burma, as well as in other parts of India, whose consumption it has not been possible to ascertain.

(a) Figures are for the official year 1915-16

(b) Statistics are for 1912, later figures not being available

(c) Excluding coke

(d) Statistics are for 1908, later figures not being available

(e) Figures are for 1914

* Bunker coal is not included in the figures of export (vide footnote to table No. 34)

Cotton mills.—In the case of cotton mills, only 60 out of 261 mills have sent in reports. In the case of mills which have furnished no returns, estimates have been made on the basis of the number of looms and spindles at work.

Tea gardens.—On many tea estates wood is the only or chief fuel employed.

Brick and Tile manufacture.—It is probable that from 7 to 10 per cent of the total amount of raisings is used in the brick and tile industry, but no complete statistics of this industry are available.

Other forms of industrial and domestic consumption.—There are no means at present of framing an estimate of how the balance of 3·3 million tons is consumed. Cotton presses and jute presses doubtless account for a considerable proportion. Excluding indigo factories and premises used solely for the purposes of tea and coffee plantations, there are, in addition, many other factories worked by steam and a considerable number of other concerns too small to be included in the factories return. Many of these use fuel other than coal, wholly or in part, but it may be assumed that the greater portion of the balance of 3·3 million tons of coal must be debited to industrial consumption and only a small part to domestic consumption.

The growth of the coal-mining industry may be roughly gauged from the marginal table, showing the number of Joint Stock Coal Companies and their total paid-up capital. The total amount of capital employed in the coal-mining industry cannot be stated, as reports relating to capital are received from Joint Stock Companies only, and the capital employed by private individuals and syndicates is not known. There were 142 Joint Stock Companies at work in Bengal and 2 in Bihar and Orissa on the 31st March, 1916. The Companies accounted for 77 per cent of the total output of the Bengal and Bihar and Orissa coal-fields in 1915. Outside Bengal and

	Number	R (lakhs)

1912-13	130	716
1913-14	142	725
1914-15	145	747
1915-16	150	752

Bihar and Orissa, there were only six Joint-Stock Companies at work during the year. Only seven of the Coal Companies at work on the 31st March, 1916, have each a paid-up capital (exclusive of debentures) of R15,00,000 (£100,000) or more, as shown in the margin. There are twenty-one others, each of which has a paid-up capital of R7,50,000 (£50,000) but less than R15,00,000.

	R
Hyderabad (Deccan) Company (a) (b)	1,00,80,000
Bengal Coal Company	30,00,000
Burrakur Coal Company	26,25,000
Equitable Coal Company	24,00,000

Bokaro and Ramgur	16,00,000
Salore Coal Company	15,00,000

The production, exports, imports, and the balance left for consumption of coal in India and Japan from 1891 are compared in table No. 40. In the first quinquennium, the production of coal in Japan was about a million tons more than that of India. Since then the production of Japan has gone ahead, and in 1914 exceeded that of India by nearly 5,361,000 tons. As regards the foreign import trade, India, as already noted, diminished her imports from abroad steadily till 1905 when a revival took place, but in 1915 the imports again declined. Imports into Japan, under normal conditions, were inconsiderable in comparison with India until 1908; since then there has been a steady increase, and the imports are now nearly 610,000 tons. Production in Japan has always exceeded the requirements of internal consumption, leaving a considerable surplus for export; India's net exports are 562,000 tons. The quantity left for internal consumption was about the same (nearly 11 million tons) in both the countries in 1907. In 1908 India retained about two-thirds of a million tons more than did Japan, but from 1909 the quantity retained for consumption in Japan has always exceeded that in India, the excess in 1914 amounting to about 3 million tons. The marginal table shows the estimated internal consumption of coal in Japan in the three years 1912 to 1914. The figures exclude bunker coal. These figures may be compared with estimates of the consumption of coal in India given on the preceding page. The freight per mile for coal carried by Indian railways to the places mentioned on page xii is about 2 pies per ton per mile, except in the case of Howrah

	1912 tons	1913 tons	1914 tons
Railways	1,553,308	1,755,103	1,871,422
Production of salt	779,163	785,396	793,877
Factories	6,511,308	7,491,458	8,183,680
Other forms of consumption	(Not known)	(Not known)	(Not known)

(in close proximity to Calcutta) where the rate comes to 3½ pies per mile. The average rate of freight for coal on Japanese railways is 9½ pies per ton per mile.

Table No. 41 gives comparative statistics of the average value of coal in the coal-mining industry in the different parts of the British Empire and in the principal foreign countries for a series of years so far as available.

JOINT STOCK COMPANIES

[FOR TABLES, SEE PAGES 95 to 119]

The statistics are compiled from reports and returns prepared by the Registrars of Joint-Stock Companies in British provinces under the Indian Companies Act, IV of 1882 (repealed by Act VII of 1913, which came into force on 1st April 1914), the Indian Life Assurance Companies Act, VI of 1912, and the Provident Insurance Societies Act, V of 1912, and in the Native State of Mysore under the Mysore Companies Regulation, III of 1895.

The total number of companies limited by shares which have been incorporated in India up to 1915-16 under the laws relating to the registration of companies amounts to 7,130. Of these, 2,476 companies were

(a) The Company was registered in the United Kingdom

(b) The Company is also engaged in gold, diamond, etc., mining operations

Source of statistics
British Empire and Foreign countries
Companies limited by shares incorporated in India

working at the end of the year 1915-16, most of the remainder having been either wound up, or otherwise discontinued or never having commenced business, so that about 65 per cent of the companies registered have ceased working. Some companies have also been taken off the Indian register to be reconstructed as companies under the English law with their head office in London. All the Companies registered in India have a rupee capital with the exception of the Hongkong and Shanghai Banking Corporation, which was registered in Calcutta in 1869 with a capital in Hongkong dollars of which the rupee equivalent is stated. The number of companies at work and the capital invested in them stood as follows at the end of each of the last three years :—

	1913-14	1914-15	1915-16
Number of Companies	2,744	2,545	2,476
Authorised Capital, R (1,000)	2,33,33,61	2,30,09,47	1,84,20,90
Paid-up Capital, R (1,000)	76,66,18	80,78,81	85,02,45

There was thus a decrease in the year 1915-16 of 69 in the number of companies, as against the previous year or 2·7 per cent, and of R45,88,57,000 in the authorised capital, or 20 per cent; the paid-up capital, however, showed an increase of R4,23,64,000 or 5·2 per cent.

The changes made in the year, which produced the results shown above, were :

- (1) 201 companies with an authorised capital of R55,67,00,000 and a paid-up capital of R1,66,23,000 ceased to do business ;
- (2) 131 new companies with an authorised capital of R7,20,49,000 and a paid-up capital of R66,82,000 were registered during the year ; and one company under liquidation with an authorised capital of R2,88,000 and a paid-up capital of R2,69,000 was restored to the list of working companies during the year ;
- (3) the authorised capital of 46 companies was increased by R2,77,84,000, while that of six companies was reduced by R22,78,000 ;
- (4) the paid-up capital of 665 companies was increased by R5,66,56,000, while that of 80 companies was reduced by R46,20,000.

The following statement shows the number of companies at work, and the amount of paid-up capital, in each of the provinces at the end of the last two years :—

Province	NUMBER OF COMPANIES		PAID-UP CAPITAL		Increase+ or decrease— per cent in Capital in 1915-16	Provincial proportion of paid-up Capital to total paid-up Capital in 1915-16
	1915-16	1914-15	1915-16	1914-15		
			R(1,000)	R(1,000)	per cent	per cent
Bengal	1,023	970	33,31,31	30,76,33	+8·3	39·18
Bombay	540	589	32,53,08	31,51,78	+3·2	38·26
Madras	343	360	5,91,07	5,59,13	+5·7	6·95
United Provinces	147	161	4,61,60	3,81,46	+21·0	5·43
Burma	106	114	5,38,08	5,77,61	—6·8	6·33
Punjab and Delhi	100	117	1,72,79	1,75,84	—1·7	2·03
Assam	60	65	21,26	18,63	+14·1	·25
Bihar and Orissa	39	49	13,35	9,17	+45·6	·16

Bangalore (Civil and Military Station)	8	10	7,80	8,19	—4·8	·09
North-West Frontier Province	2	2	2,21	2,20	+·5	·03
Coorg	1	1	24	24
Mysore State	65	65	45,80	54,63	—16·2	·54
TOTAL	2,476	2,545	85,02,45	80,78,81	+5·2	100

The total net increase in paid-up capital was R4,23,64,000 : in Bengal R2,51,98,000 ; in Bombay R1,01,30,000 ; and in Madras R31,94,000. Bengal and Bombay between them have about 77 per cent of the whole paid-up capital of jointstock companies in British India and Mysore.

The number of companies registered in Bengal is over two-fifths of the total number registered throughout India, but the average paid-up capital per company is highest in Bombay, and in this respect Burma occupies the second place, and Bengal the third, as will be seen from the subjoined table showing the average paid-up capital of a company in each province in the last two years :—

	AVERAGE CAPITAL OF A COMPANY	
	1915-16	1914-15
	R	R
Bombay	6,02,000	5,35,000
Burma	5,08,000	5,07,000
Bengal	3,26,000	3,17,000
United Provinces	3,14,000	2,37,000
Punjab and Delhi	1,73,000	1,50,000
Madras	1,72,000	1,55,000
Central Provinces and Berar	1,68,000	1,68,000
Ajmer-Merwara	1,23,000	1,22,000
North-West Frontier Province	1,16,000	1,10,000
Bangalore (Civil and Military Station)	97,000	82,000
Mysore State	70,000	84,000
Assam	35,000	29,000
Bihar and Orissa	34,000	19,000
Coorg	24,000	24,000

The comparatively low place of Madras in respect of the average capital, in spite of its occupying the third place in respect of the number of companies, is to be found in the extremely large application of the Companies Act to the business of small money-lenders ; for no less than 184 out of the 460 "banking and loan" companies in all India have been registered in Madras with a paid-up capital of Rs. 12 lakhs.

The statement below shows the distribution of the aggregate capital in the principal classes of joint stock enterprise at the end of 1915-16 as compared with that at the end of the preceding year :—

Class of Companies	NUMBER		AUTHORISED CAPITAL		PAID-UP CAPITAL	
	1915-16	1914-15	1915-16	1914-15	1915-16	1914-15
			R(1,000)	R(1,000)	R(1,000)	R(1,000)
Banking and loan	460	475	55,79,17	56,92,76	8,34,04	7,98,51
Insurance	168	183	16,33,31	16,64,47	50,22	50,84
Navigation	22	24	4,03,50	3,68,10	1,33,16	1,28,78
Railways and tramways	54	46	15,89,40	13,25,40	10,24,73	8,36,47
Other trading companies	718	767	21,28,81	70,47,03	12,27,20	11,42,29
Cotton mills	196	205	21,14,04	21,96,91	16,42,15	16,70,71
Jute mills	37	34	9,03,21	8,02,21	7,79,71	7,61,10
Mills for wool, silk, hemp, etc.	15	14	3,55,75	2,26,50	1,99,71	1,32,42
Cotton and jute screws and presses	137	139	3,60,95	3,62,25	2,67,73	2,70,21
Rice mills	27	28	1,35,50	1,39,47	79,31	81,08
Flour mills	30	30	1,11,55	1,12,85	80,29	80,58
Other mills and presses	42	45	2,10,70	1,40,40	92,64	90,17
Tea planting	220	208	6,47,41	6,03,44	4,60,83	4,31,90
Other planting companies	32	30	1,05,86	99,10	46,07	42,41
Coal mining	144	140	7,73,35	7,76,77	6,12,03	6,09,49
Gold mining	8	8	46,58	50,07	37,91	33,32
Other mining and quarrying	58	59	7,36,98	8,28,18	5,33,21	5,85,45
Land and building	38	34	3,78,50	3,43,80	2,73,96	2,17,76
Sugar manufacture	18	22	1,14,38	1,35,88	80,89	80,75
Other companies	52	54	91,94	93,88	46,66	34,57
TOTAL	2,476	2,545	1,84,20,90	2,30,09,47	85,02,45	80,78,81

The total amount of paid-up capital invested in banking, loan, and insurance companies is Rs. 84,26,000, of which 36 per cent is shared by companies registered in Bengal and 24 per cent by those in Madras. There is a striking contrast between the authorised and the paid-up capital of insurance companies. Most of these are the so-called provident or mutual aid societies registered in Bengal, where no less than 125 out of 168 insurance companies are registered.

Trading companies account for a paid-up capital of Rs. 23,85,10,000, of which over a third (Rs. 10,24,73,000 or nearly 42 per cent) is invested in railways and tramways. Bombay represents about Rs. 6,28,10,000 or 61 per cent of the total capital invested in railways and tramways and Bengal Rs. 3,78,91,000 or 37 per cent.

About three-eighths (Rs. 31,41,51,000) of the aggregate paid-up capital are invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. A great number of the mills and presses are registered in Bombay, that presidency representing about 50 per cent (Rs. 15,02,81,000) of this sum, and most of it being invested in cotton mills and presses. Mills and presses (mainly jute) registered in Bengal represent about two-thirds (Rs. 10,17,02,000) of the capital invested in mills and presses in Bombay.

In tea, coffee, and other plantations, Rs. 5,06,90,000 of the paid-up capital are invested, of which Rs. 4,34,74,000 are held in Bengal, the majority of the tea companies owning gardens in north-eastern India being registered in Calcutta.

Mining and quarrying The capital of mining and quarrying companies is R11,82,15,000, of which over 50 per cent is invested in companies registered in Bengal, most of it representing capital invested in coal mines.

In the year under review there was a substantial increase in the paid-up capital applied to railways and tramways and to banking and loan. The increase in the capital applied to the manufacture of jute, wool, silk, etc., to tea planting, and to land and building was also considerable. In cotton mills, in cotton and jute screws and presses, in rice mills, and in mining other than coal and gold, there was a decrease. In most other directions, it may be noted, there has been an augmentation of capital.

New registrations As stated above, 131 new companies were registered during the year 1915-16, with an authorised capital of R7,20,49,000 and a paid-up capital of R66,82,000, as compared with 112 companies with an authorised capital of R4,43,19,000 and a paid-up capital of R28,24,000 registered in 1914-15.

Main features of the year

The marginal table shows the number and capital of the new companies registered in each of the last five years. It will be seen that there was a considerable falling off in the number of companies registered during the year 1914-15, as compared with previous years. Some of the flotations of 1913-14, especially among the banking, insurance, navigation, and cotton manufacturing companies, were forced in order to take advantage of the milder registration law then in force. A decrease in new registrations during the year 1914-15 was, therefore, to be looked for even in ordinary circumstances. The banking crisis of 1913-14* followed by the financial stringency due to the war, naturally proved an effective damper of much new enterprise. These two causes combined with the stringent provisions of the new Companies Act (VII of 1913), which came into force in April, 1914, caused a period of stagnation in the registration of new companies as well as in respect of the operations of existing companies. The year 1915-16, however, showed a slight increase in the number of new companies registered.

Grades of new companies according to capital

The following statement gives a classification of the new companies registered in 1915-16 and 1914-15 according to the amount of their authorised capital:—

Authorised Capital		Number of Companies	
		1915-16	1914-15
Under R1,000	
R 1,000 and under R 5,000		..	1
R 5,000 " " R 10,000		2	2
R 10,000 " " R 20,000		4	3

R 7,50,000 " " R 10,00,000		5	2
R 10,00,000 and above		22	13
		131	112

Debenture capital From the above it appears that the representative companies are those which have an authorised capital between R1,00,000 and under R2,00,000.

It should be noted that the capital dealt with in the foregoing paragraphs represents the share capital only, while several companies have issued debentures, the total value of which at the close of the half-year ending June, 1916, amounted to R12,61,25,000, of this R6,23,44,000 belong to Bengal, R4,49,78,000 to Bombay, R1,22,77,000 to the United Provinces, and R39,68,000 to Madras. The amount of cotton mill debentures was R3,07,86,000, of jute mill debentures R3,70,05,000, and of paper mill debentures R20,08,000.

At the close of the year 1914-15, there were 212 companies limited by guarantee, not having a share capital (including associations not for profit), incorporated in India under the Indian Companies Act. Of these, 9 ceased to work and 10 new companies were registered during the year 1915-16, giving a total of 213 companies at work on the 31st March, 1916.

Companies limited by guarantee and association not for profit

Companies incorporated outside India

Statistics have been collected, so far as possible, regarding companies which are incorporated elsewhere than in India, chiefly with sterling capital, but which carry on work in India. The total number of such companies working at the end of 1915, for which returns are available, was 605, and the paid-up capital thereof amounted to £294,534,000, besides £116,418,000 being the amount issued as debentures. Railways represent £29,802,000 of the paid-up capital and £54,551,000 of the debentures. Of the remainder, the sterling share capital invested in the tea industry is £18,027,000 and in jute mills £2,730,000. The gold fields in Southern India are chiefly worked by companies formed in the United Kingdom, the paid-up sterling capital being £2,331,000. Detailed statistics regarding these foreign companies are given in table No. 48. It should, however, be borne in mind that in the case of most of the banking and insurance companies and of some of the navigation and other trading companies incorporated outside India, only a portion, sometimes a very small portion, of the capital shown above is invested in India, as these companies work also in other countries besides India, and information regarding the portion of their capital invested in India is not available.

Fees collected The amount of fees, for both registration and copying, realised by the provincial Registrars of Joint Stock companies in connection with the registration of companies in the year under review amounted to R89,603 as compared with R98,981 in the preceding year.

*In 1913 12 banks with an aggregate paid-up Capital of R35,13,000 failed

 " 1915 11 " " " " " " R4,60,000 "

PATENTS AND DESIGNS

-[FOR TABLE, SEE PAGE 120]

The laws for granting exclusive privileges to inventors and for protecting patterns and designs were amended and consolidated by the passing of the Inventions and Designs Act, V of 1888. This Act has since been repealed by the Indian Patents and Designs Act, II of 1911, which came into force on the 1st January, 1912, but certain applications made under the repealed Act of 1888, which were pending at the close of 1911, were disposed of in 1912. The year 1912 was, therefore, one of transition during which two methods of procedure were in force, so that the figures and details from that year are not strictly comparable with those of earlier years. The statistics presented in this table summarise the working of the law for the last ten years.

The inventions for the use of which exclusive privileges have been sought or acquired during recent years, ^{Patents} relate in the main, so far as the subjects are enumerated, to bicycles and similar vehicles, the manufacture of tea, railway material, lamps and burners, the treatment of metals, electrical contrivances, spinning and weaving machines, water-lifts and pumps, sugarcane and other mills, chemical appliances and preparations, improvement in building and building materials, flying machines, and talking machines. The number of applications made in 1915, under section 3 of the Indian Patents and Designs Act of 1911 for the grant of a patent, was 445 as compared with 588 in the previous year, the decrease being ascribed to the war.

Of the 445 applications for the grant of a patent presented in 1915, 334 were accepted and 111 were pending. Of the applications 175 were made by residents in India, of whom 70 were Indians and 105 other residents. The remaining 270 came from outside India.

The total number of applications up to the end of 1915, under section 3 of the Act of 1911, has been 2,416, and as the result 1,775 patents have been sealed. In addition to this, 148 patents were sealed on 158 applications made under section 81 for the conversion of exclusive privileges obtained under the old Act of 1888 into patents under the new Act of 1911, but of these 148 converted patents 66 have been allowed to cease. There are also 1,147 exclusive privileges under the Act of 1888.

The number of applications for registering copyright in designs during the year shows a considerable ^{Designs} decrease—there were 904 in 1915 as compared with 1,440 in 1914. Of the 904 applications made, 854 were registered, only 18 of them being from residents in India. The number of applications—since the Act of 1888 came into force now stands at 4,374.

The income from fees received during the year aggregated R69,760; of this amount the sum of R51,450 represented continuance fees, by payment of which existing privileges are kept in force.

FOREIGN TRADE AND SHIPPING

[FOR TABLES, SEE PAGES 121 TO 156]

These tables, which include imports and exports on account of Government, exhibit, for various periods extending in many cases back to 1834-35, the progress of the foreign sea-borne trade of India generally, and of each province separately, in the principal articles of trade, and with the principal foreign countries, also the progress of shipping. They thus supplement the annual accounts of the foreign trade which exhibit the progress of the trade for only five years.

The following statement shows the variations in the imports and exports (including re-exports) from 1885-86 given in table No. 50, the annual average trade of the ten years 1904-05 to 1913-14 (*i.e.*, the ^{Progress of} foreign sea-borne trade decennium preceding the outbreak of war being taken as 100):—

	Imports			Exports, including re-exports		
	Merchandise	Treasure	Total	Merchandise	Treasure	Total
1885-86 to 1894-95 .	50	37	47	51	36	50
1895-96 to 1904-05 .	61	56	60	62	108	64
1905-06 . .	83	76	81	83	170	87
1906-07 . .	86	107	91	91	63	90
1907-08 . .	101	101	101	91	60	90
1908-09 . .	95	55	85	79	69	78
1909-10 . .	90	90	90	96	70	95
1910-11 . .	98	95	98	108	78	106
1911-12 . .	106	128	111	117	114	117
1912-13 . .	123	148	129	126	117	126
1913-14 . .	141	104	132	128	78	126
1914-15 . .	107	52	94	93	58	92
1915-16 . .	102	29	85	102	90	102

A full report of the trade of each year will be found in the *Review of the Trade of India* which has been published annually for the past forty-three years.

The statement below shows the details of the total sea-borne trade, both private and Government, during the five years ending 1915-16

	1911-12	1912-13	1913-14	1914-15	1915-16
	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)
Imports of Merchandise	144,05 54	166,62,97	191,30,80	144,93,07	138,16,53
„ Treasure	53,47,09	61,83,17	43,43,96	21,80,83	11,94,62
TOTAL IMPORTS	197,52,63	228,46,14	234,74,76	166,73,90	150,11,55
Exports of Merchandise	227,98,98	246,21,83	249,00,75	182,17,60	199,18 04
Treasure	10,37,39	10,63,18	7,08,29	5,28,95	8,22,58
TOTAL EXPORTS	238,36,37	256,85,01	256,09,04	187,46,55	207,70,62
TOTAL SEA-BORNE TRADE	435,89,00	485,31,15	490,83,80	354,20,45	357,82,17
Net Imports of Treasure	43,09,70	51,19,99	30,35,67	16,51,88	3,72,04
Net Exports of Merchandise	83,93,44	79,58,86	57,69,95	37,24,53	61,31,11
Excess of Exports over imports	40,83,74	28,38,87	21,34,28	20,72,65	57,59,07

During the year 1915-16, the seasonal conditions of India were, on the whole, favourable and the prosperity of the world's trade in spite of some adverse circumstances reacted on the Indian trade. The imports of merchandise fell by R6·76 crores to R138·17 crores, while the total exports, including re-exports, advanced by R17·3 crores to R199·48 crores. The ratio of increase is shown below, by taking the figures for 1915-16 as equal to 100 :

	1913-14	1914-15	1915-16
Exports of merchandise	121·8	91·3	160
Imports „ „	138·5	104·8	100
Total	120·4	16·9	160

Imports

The decrease under imports in 1915-16 was chiefly due to reduced shipments from the United Kingdom (—R16·02 crores), from Germany (—R4·19 crores), from Austria-Hungary (—R1·29 crores), and from Belgium (—R 1·4 crores). Bengal shared the largest decrease of R4·24 crores, and Bombay and Sind came next with R2·02 crores.

The principal articles showing marked variations are shown in the table below :

	QUANTITY (000 omitted)		VALUE (000 omitted)		INCREASE + OR DECREASE— PER CENT COMPARED WITH 1914-15	
	1914-15	1915-16	1914-15	1915-16	Quantity	Value
Arms, ammunition, and military stores	—	—	R 61,56	R 48,72	—	—24·5

Under exports the United Kingdom accounted for an increase of R18½ crores, the United States of America of R4 crores, Japan of R2½ crores, Italy of R2 crores, while the exports to Germany, Belgium, and Austria-Hungary were nil as against R10 crores, R5½ crores, and R4½ crores, respectively, in the preceding year. The share of Bengal in the export trade advanced by R17½ crores, and of Madras by R3 crores, while Bombay and Sind's share fell by nearly R2 crores, and Burma's by R1½ crores. The principal articles which showed marked variations are shown in the appended table :

	QUANTITY (000 omitted)		VALUE (000 omitted)		INCREASE + OR DECREASE— PER CENT COMPARED WITH 1914-15	
	1914-15	1915-16	1914-15	1915-16	Quantity	Value

The trade of the principal ports of India is detailed in table No. 64. Calcutta shows an increase of Trade of R12.7 crores, and Madras of R1.6 crores, while Bombay accounts for a decrease of R3.6 crores, Karachi of R34 lakhs, and Rangoon of R53 lakhs.

In 1915-16 the imports of treasure decreased by R9.86 crores, gold showing a decrease of R5.42 crores and silver of R4.44 crores. Exports of treasure increased by R2.93 crores, gold showing an increase of R3.33 crores but silver a decrease of R40 lakhs.

A summary table of the imports and exports of gold and silver is given below :

	1911-12	1912-13	1913-14	1914-15	1915-16
	R (000 omitted)	R (000 omitted)	R (000 omitted)	R (000 omitted)	R (000 omitted)
Imports of gold	41,49,36	41,29,08	28,22,64	10,70,38	5,28,17
Exports of gold	3,73,38	7,28,96	4,90,26	3,05,64	6,39,08
NET IMPORTS OF GOLD	37,75,98	34,00,12	23,32,38	7,64,74	-1,10,91

Exports of silver	6,64,00	3,34,22	2,18,03	2,23,31	1,83,50
NET IMPORTS OF SILVER	5,33,72	17,19,87	13,03,29	8,87,14	4,82,95
NET IMPORTS OF TREASURE	43,09,70	51,19,99	36,35,67	16,51,88	3,72,04

Shipping

The number and tonnage of steamers and sailing vessels with cargoes and in ballast which entered from and cleared to all countries during 1915-16 were 8,634 and 12.15 million tons, as detailed below, as compared with the previous four years :—

			1911-12	1912-13	1913-14	1914-15	1915-16
Entered	{	Vessels	4,481	4,408	4,294	3,937	4,212
		Tons (000 omitted)	8,355	8,728	8,624	6,313	6,038
Cleared	{	Vessels	4,387	4,341	4,323	4,023	4,422
		Tons (000 omitted)	8,262	8,757	8,762	6,545	6,114

In 1915-16 the number of vessels under the principal flags were British and British Indian 5,606, Japanese 283, Norwegian 177, Dutch 141, Italian 91, Russian 51, and native 2,185.

WRECKS

[FOR TABLE, SEE PAGE 157]

This table exhibits the number of British, British Indian, and native vessels which were totally lost in Indian waters (from Suez to Penang), the total tonnage of vessels wrecked, and the number of lives lost, in the past twenty-five years.

The number and tonnage of each class of vessels annually lost from 1877 and the proportion which the number and tonnage bear to the total number and tonnage of vessels that cleared from Indian ports, are approximately as follows :—

	BRITISH								BRITISH INDIAN				NATIVE CRAFT			
	STEAM				SAILING				SAILING							
	Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to

30 vessels were totally lost in 1915, of which 5 were British, 21 British Indian, and 4 native craft, excluding one vessel of foreign nationality. There were 2 collisions, 11 foundering, 15 strandings and 2 miscellaneous cases amongst the wrecks. In a total of 30 wrecks, 19 lives were reported to have been lost during the year:—

The causes of exceptional loss of life in certain years are stated below—

1876. 400 pilgrims perished in the *Hydari*, bound from Calcutta to Jeddah.

1879. Continuous bad weather, and a cyclone, on the west coast of India in May.

1885. The *Speke Hall* foundered (58 lives lost) in the Gulf of Aden; and three vessels were wrecked (239 lives lost) in cyclones in the Bay of Bengal and on the east coast of Arabia.

1887. The *Sir John Lawrence* foundered (750 lives lost) at the mouth of the Hooghly in a cyclone.

1888. The *Vitarra* (800 lives lost) wrecked off the Kathiawar coast in a cyclone.

1891. Four vessels were wrecked in a cyclone in the Bay of Bengal.

1892. The *Deccan* foundered (214 lives lost) in the Indian Ocean.

1896. The *Luna* was wrecked (75 lives lost) in the Gulf of Aden.

1902. The *Camorta* was wrecked (781 lives lost) on the Burma Coast.

1905. The *Hashemi* foundered (74 lives lost) off the south Orissa coast in a cyclone.

1911. The *Fifeshire* was wrecked (24 lives lost) in the Gulf of Aden.

1912. The *Chinko* foundered (100 lives lost) in the Hlaing river near Tantabin (Burma).

1913. Two vessels (*Aungmya* and *Mombai Salamat*) capsized, the former near Onbinzeik, Attarax river (Burma), and the latter in the Gulf of Cambay, the total number of lives lost being 83.

MERCHANDISE MARKS

[FOR TABLE, SEE PAGE 158]

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act.

The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature, a provision was added to require that all piece goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description.

In 1915-16 the total number of infringements of the Act were 2,190, as against 1,199 in 1914-15. Of this Bengal reported 638, Bombay 1,100, Burma 223, Madras 130, and Sind 99 cases. The increase mainly occurred in Bombay, and is mainly due "to the fact that owing to the war the place of German and Austrian goods is being taken by manufactures of other countries, the shippers failing to comply with the requirements as to marking." The majority of the infringements (1,705 out of 2,190) were cases of false trade description as to the country of origin. In many of these cases it was reported that "goods not manufactured in the United Kingdom or British India bore names of British Indian dealers or were described in such a manner as to suggest British or British Indian origin," or "goods made in one foreign country bore descriptions suggestive of origin in another foreign country", or "goods manufactured chiefly in Japan and the United States of America bore descriptions suggestive of British origin." Usually detained goods are released with a fine. In 1915-16, however, this procedure was followed in 1,045 cases; and in 1,143 cases the detained goods were released without the infliction of a fine, but with a warning to the importers or with orders insisting on the correction of the offending marks. Detention is but rarely followed by confiscation, and there were only 2 such cases during 1915-16.

The average number of detentions under the Act during the twenty years ending 1915-16 has been as stated			
Average of the five years ending 1900-1901	1,543	in the margin.	In this period of twenty years, 39 per cent of the
" " " " 1905-06	1,157	detentions were on account of the application of false trade	
" " " " 1910-11	1,632	marks or false trade descriptions. In 42 per cent of the cases	
" " " " 1915-16	2,080	detention was ordered because the country of origin was either	

not stated or was falsely stated, and in 19 per cent because the provisions of the Act for the stamping of piece goods had been infringed.

POST OFFICE

[FOR TABLES, SEE PAGES 159 TO 192]

The main business of the post office is the conveyance and delivery of letters, postcards, newspapers, parcels, and book-packets. The total length of mail lines over which its work is carried on is 157,657 miles. Railway and steamer services now extend over 54,809 miles of this length, and the other 102,848 miles are worked by boats, mail-carts, horses, camels, and runners. Many carriage and cart lines are, however, subsidised for the carriage of mails. The number of post offices is 19,328, of letter-boxes 49,684 (excluding those at post offices), and of village postmen 8,225. The actual number of registered articles of the letter mail and of parcels posted, added to the estimated number of unregistered articles of the letter mail given out for delivery, in 1915-16 amounted to more than 1,051 millions. Letters and other articles carried

In 1899 the Indian Post Office joined the International Parcel Post Union; and parcels are now exchanged by post between India and almost every country in the world. International Parcel post

In 1877 the post office undertook to collect from the addressee the declared value of a parcel or registered article and to transmit the money to the sender. The extent to which this system is used by traders and their customers is indicated by the fact that in 1915-16—38 years after its introduction—the number of value-payable articles carried was 9,653,000 and the value declared for realisation was Rs12,92,59,000. Value-payable parcels

In December, 1898, the limit to the sum for which an article could be insured was raised for registered letters and value-payable registered letters and registered parcels to Rs2,000, and the procedure in connection with the insurance of articles was simplified, the sender of an insured article being no longer required to declare its contents. The insurance fee was at first fixed at one-half per cent, but shortly afterwards it was reduced to one-quarter per cent, and in July, 1905, it was further reduced to one-eighth per cent. The gross sum for which articles were insured by the post office in 1915-16 was nearly Rs74,00,00,000. Insurance of letters and parcels

In 1880 the Government of India transferred from the treasuries to the post office the business of the issue and payment of money orders, with the result that within a few months the number of orders issued was quadrupled. The value of inland money orders issued has increased from Rs4,57,09,000 in 1880-81 to Rs54,26,52,000 in 1915-16. Special arrangements have been made to adapt the money order system to remittances of revenue, rent, and miscellaneous Government dues, and in several provinces the system is largely used for these purposes. The commission on inland money orders is 4 annas for each complete sum of Rs25, with lower rates of 1 anna, 2 annas, and 3 annas, respectively, for any sums or remainders not exceeding Rs5, Rs10, Money orders

and R15. Foreign money orders are also exchanged with the principal countries of the world, the maximum limit of a rupee order being R600 and that of a sterling order £40, except in a few cases in which the maximum limit is either £10 or £20.

British Postal orders In 1884 the Indian Post Office undertook the sale of British postal orders. Such orders, ranging in value from 6d. to 21s., can now be exchanged with the greater part of the British Empire and are also used for inland remittances.

Savings banks* In 1870 Government savings banks* were established in connection with district treasuries. In 1882 sanction was given for the opening of savings banks at post offices, and three years later the closure of the treasury savings banks was ordered. In 1882-83 the number of depositors in the postal savings banks was 39,000 and the sum at their credit R27,97,000. By the end of 1915-16 the number of depositors increased to 1,669,000 and the sum at their credit amounted to R15,32,13,000. The post office undertakes on behalf of depositors the purchase and sale of Government promissory notes and the transfer of such notes to the Accountant-General, Post Office and Telegraphs, for custody on behalf of the purchaser.

Postal telegrams In 1883 many post offices were made receiving offices for the transmission of inland telegrams by post to the nearest telegraph office; and telegraph work was also undertaken by the post office in a certain number of offices. The number of telegraph offices has thus been largely increased, and out of 3,484 state (non-railway) telegraph offices on the 31st March, 1916, 3,288 were postal telegraph offices. In 1915-16 the number of messages transmitted by receiving offices was 79,000 and the number of messages signalled by postal telegraph offices was 10,620,000 excluding free messages.

Postal life insurance In 1884 sanction was given to a scheme of life insurance, whereby an officer of the postal service is enabled to obtain a policy for a sum not exceeding R4,000 on the security of Government. In 1888 the scheme was extended to the Telegraph Department. In February 1898 the scheme was extended generally to all Government servants, who are subject to civil rules, and a system of endowment assurances was added to the scheme. By the end of 1915-16, nearly 35,000 lives had been insured for the aggregate sum of R4,69,26,000.

Payment of military pensioners In 1890 the post office undertook the payment of military pensioners in the Punjab at the post offices nearest their homes. The number of pensioners thus paid in 1915-16 was about 55,000 and the aggregate sum paid to them R34,78,000.

Rates of postage, inland and foreign *Letters and postcards.*—With effect from the 1st October, 1907, the weights of letters allowed for $\frac{1}{2}$ anna and 1 anna were raised from $\frac{3}{4}$ to 1 tola and from $1\frac{1}{2}$ to 10 tolas, respectively. Embossed envelopes bearing a half anna coloured impressed stamp and sold at the face value of the stamp without any charge for the envelopes were introduced in 1873. Formerly an additional charge was made for re-direction, equal to the postage paid when the letter was posted, but the additional charge was discontinued in 1877. The introduction of the inland postcard in 1879 gave a still lower rate of postage than that given by the rate of half an anna per half tola with an envelope supplied without charge. The inland postcard has from its introduction been priced at one pice (three pies) per single card and half an anna per reply card, the price in each case covering the cost of the card as well as postage.

Newspapers and packets.—A new system of “registering” publications as newspapers was introduced in January, 1897, under which a “registered newspaper” of weight not exceeding twenty tolas is carried by the inland post for half an anna. From the 1st January, 1904, the maximum weight for a registered newspaper admissible for transmission through the post for one-quarter of an anna postage was raised from 4 to 6 tolas. This weight has been further raised, since the 1st October, 1908, from 6 to 8 tolas, concurrently with an increase from 20 to 40 tolas in the maximum weight admissible for half an anna postage.

The postage on packets other than newspapers was one anna for 10 tolas until 1877, when the rate was reduced to one anna per 10 tolas for book packets and two annas per 40 tolas for book packets and patterns. In 1878 the packet rate was lowered to half an anna per 10 tolas.

Parcels.—The present rates of postage, which came into force on the 1st October, 1907, and which are applicable to all classes of parcels, are (1) in the case of parcels not exceeding 440 tolas in weight, 2 annas for every 40 tolas or part of that weight; and (2) in the case of parcels exceeding 440 tolas in weight, R3 for a parcel not exceeding 480 tolas in weight, and 4 annas for every additional 40 tolas.

Registration fees.—From the 1st July, 1901, the fee for the registration of a parcel was fixed at a uniform charge of 2 annas.

Official papers.—With effect from the 1st October, 1907, the postage rates for official letters, packets, and parcels are the ordinary rates for those articles.

Foreign postage.—The rates now are—for letters, $2\frac{1}{2}$ annas for the first ounce and $1\frac{1}{2}$ annas for every additional ounce; for post cards, single, 1 anna each; reply, 2 annas; for printed papers, half an anna per two ounces; for business papers entirely or partly in manuscript, $2\frac{1}{2}$ annas for the first 10 ounces and half an anna for every 2 ounces additional; for samples, 1 anna for the first 4 ounces and half an anna for every 2 ounces additional. Since the 1st October, 1907, the rate for letters sent from British India to the United Kingdom and almost all British Possessions, as also to Egypt (including the Soudan), has been fixed at one anna for every ounce or fraction thereof.

	Contract with the Post Office for 2 years from 1st January, 1914, and afterwards to continue, if not determined by notice	6,600
	Under contract with Burma Government for 5 years from 1st April, 1915, the subsidy which is paid by the Burma Government annually is	1,05,200
	For China and Australian mail services
	Contract for 8 months from 1st October to 31st May, share of annual subsidy	22,400
	Contract with the Government of Somaliland Protectorate for 18 months from 1st October, 1914, share of subsidy paid by the Indian Post Office	4,500
	TOTAL	12,31,482

For the lines of postal communication under contract with the Peninsular and Oriental Company an annual subsidy of £305,000 is paid by His Majesty's Government for the combined Eastern and Australian mail services. The Indian share of this subsidy has not yet been assessed.

TELEGRAPHS

[FOR TABLES, SEE PAGES 193 TO 196]

**partmen-
changes
and tariff**

The experimental amalgamation of posts and telegraphs in the Bombay and Central Circles in 1910 continued till 31st March, 1914, and the complete fusion of the two departments took effect from the 1st April, 1914. On the 1st January, 1909, a revised inland tariff was introduced, and it is being continued, the rates are (1) Express—one rupee for 12 words and 2 annas for each additional word, and (2) Ordinary—six annas* for 12 words and half an anna for each additional word, the address being charged for. On the 1st May, 1914, the rates for cablegrams between India and Europe were reduced from R1-8 per word *viâ* Indo or Eastern to R1-4 per word. A system of deferred telegrams in plain language at half the usual rates for private telegrams was introduced between the United Kingdom, Germany, France, Algeria, Tunis, Portugal, and the United States of America, with effect from the 1st January, 1912, and was subsequently extended to practically all European administrations, besides a number of administrations in the extra European régime. The rates between Australia on the one hand and India, Burma, and Ceylon on the other, were reduced to a uniform rate of R1-4 per word with effect from the 1st June, 1903. From the 1st May, 1914, a system of week-end cable telegrams at one-fourth the rate for ordinary telegrams, with a minimum of 20 words per telegram, was introduced between India and the principal British Possessions, Portugal, and Germany, but this was discontinued in August, 1914, on the outbreak of the European war. It was reintroduced in January, 1915, but without the minimum charge and restricted to telegrams of a social character exchanged with soldiers, sailors, and nurses serving with the Allied forces in different parts of the world.

lia and
ropo**

With effect from the 1st December, 1915, a reduction of twelve annas a word was made in the rate for telegrams exchanged between India and Mesopotamia and of two annas a word in the rates for telegrams between India on the one side and Persia and the Persian Gulf on the other. From the 15th December, 1915, a new rate of three annas a word was introduced for the exchange of Press telegrams between India and Mesopotamia.

Act XIII of 1885, as amended by Act XI of 1888 and Act VII of 1914, repealing all earlier Acts (the first being XXXIV of 1854), deals with the privileges and powers of Government in respect to telegraphs, their authority to grant licenses for the establishment of telegraphs, and the regulations under which telegraphs are to be worked. They also provide and regulate the powers of the Department to place telegraph lines and posts on public and private lands, and declare the penalties for infringements of licenses, and for all other offences connected with telegraph lines, and with the transmission of telegrams. Rules and regulations for the acceptance, transmission, and custody of telegrams are published from time to time in the *Gazette of India* by the Governor-General in Council, and have the force of law.

ssages**

The revenue and expenditure of the Department and the number of messages sent, during the five years ending 1915-16, are entered in the table below :—

	Revenue R	Expenditure R	Surplus + or Deficit — R	NUMBER OF MESSAGES					
				INLAND			FOREIGN		
				State	Private	Total	State	Private	Total
1911-12 . .	1,42,74,275	1,23,24,356	+ 19,49,919	1,207,810	11,928,575	13,136,385	19,541	1,515,893	1,535,434
1912-13 . .	1,52,79,958	1,28,21,644	+ 24,58,314	1,170,353	12,663,569	13,842,922	13,144	1,593,005	1,606,149
1913-14 . .	1,55,50,430	1,37,01,971	+ 18,48,459	1,328,413	13,609,988	14,938,401	13,593	1,641,703	1,655,296
1914-15 . .	1,70,59,934	1,40,66,947	+ 29,92,987	1,732,490	13,186,529	14,919,019	35,688	1,235,659	1,271,347
1915-16 . .	1,85,77,748	1,42,26,782	+ 43,50,966	1,888,269	14,189,037	16,077,308	62,307	1,403,273	1,465,580

The total receipts of the Telegraph Department in 1915-16 amounted to R1,86 lakhs and the working revenue charges to R1,42 lakhs, as against R1,70½ lakhs and R1,40½ lakhs, respectively, in the preceding year. Thus the gross revenue increased by 8·9 per cent and the expenditure by 1·1 per cent. The surplus amounted to R43½ lakhs as against nearly R30 lakhs in 1914-15. The increase in revenue is mainly due to additional "Fees on Telegrams" consequent on the restriction on the use of telegraph codes. The revenue charges during the year increased but slightly, due partly to the absence of a certain number of employés on field service and to the postponing of revenue works. The chief items of receipts were fees on telegrams (over R1,37 lakhs), claims from railways and canals (R29¾ lakhs), rent for telephone connections (R10¼ lakhs), claims from guarantors and royalties from telephone companies (R1 lakh each).

Expenditure debitable to capital account incurred during the year 1915-16 was R18 lakhs, bringing the grand total of such expenditure to the end of the year to R12,72½ lakhs.

The telegraph system was extended by 1,943 miles of line and 7,687 miles of wire and cable, and consisted on the 31st March, 1916, of 86,067 miles of line and 337,720 miles of wire and cable, of which 104,315 miles of wire and cable were used by railways, 10,744 for canals, 30,361 for telephone exchanges and private lines, and 192,300 for departmental purposes.

* On the 1st December, 1916, the rate for ordinary telegrams was raised from six annas to eight annas for 12 words.

The total number of inland telegrams was 16,077,308, of which 1,888,269 were State telegrams and 14,189,039 private telegrams, showing an increase of 9 per cent and of 8 per cent, respectively. The revenue derived from them amounted to over R24 lakhs and R81 lakhs, showing a decrease of 4 per cent and an increase of 8 per cent, respectively.

Foreign telegrams were 1,465,580 in number, realising R30½ lakhs, showing an increase of 15 per cent in number, and 18 per cent in value. State foreign telegrams, numbering 62,307, with a revenue of nearly R5 lakhs, showed a large increase of 75 per cent in number and 85 per cent in value. Private foreign telegrams on the other hand advanced by 14 per cent in number and 10 per cent in value.

Table No. 95 shows the general statistics of the Indo-European Telegraph Department. The total number of words telegraphed in 1915-16 was 4,201,629 and the revenue derived from messages amounted to £170,843. The total receipts of the Department amounted to £173,057 and the working revenue charges to £93,764. The expenditure, debitable to capital account at the end of the year 1915-16 was £1,027,869. [These statistics have no connection whatever with those of the Indian Telegraph Department dealt with in the preceding paragraphs.]

RAILWAYS

[FOR TABLES. SEE PAGES 197 TO 203]

Railway construction began in India about the year 1850, and was for a number of years carried out through the agency of joint-stock companies under contract with the State. The companies were given a guarantee of 5 per cent on their capital outlay, with half the surplus profits in addition after the guaranteed interest for the half-year had been met at the rate of exchange of 22d. to the rupee. The companies were required to sell their railways to Government after 25 years at a rate specified. No capital expenditure beyond that involved by the grant of free land was entailed on the State, but the general revenues had to meet the amount by which the net receipts fell short of the guaranteed interest. The railways which were constructed on these terms have played an important part in the development of the country. Although British capital was attracted into India, without which these great works could hardly at that time have been constructed, yet for many years these railways imposed a considerable burden on Indian revenues as all expectations in regard to profits were not realised, owing to the heavy outlay incurred in the construction of the lines on a gauge of 5 feet 6 inches, to the alterations in the routes after work had been commenced, and to the outbreak of the mutiny in 1857. The increasing demands for guaranteed interest proved too much and the whole guarantee system was discontinued in 1869. All the old guaranteed companies have now been purchased by Government under their contracts.

In 1870 Government began to borrow money for railway developments by direct State Agency, but expenditure was to be met by the receipts from the guaranteed railways, and no increased charge was to be thrown on the revenues. In 1879 this system ceased, and the capital outlay was limited to what Government could borrow in India without unduly pressing the market or could spare from revenue. These restrictions would, however, have hampered the work of construction, and economic progress would have been severely checked, had not Government in 1880-81 decided again to evoke the aid of private capital under a guarantee. The system now adopted was distinguished from the old guarantee and the State Railway system, and the lines promoted were called "State lines worked by companies," but practically the only difference between these and the old guaranteed companies was that the terms were easier for Government. From that time onwards a number of companies have assisted in the development of Indian railways. The main points of difference between the systems of 1870, 1879, and 1880 are:—Prior to 1870 railway construction was carried out by companies with private capital, the companies being given by Government a guarantee of a minimum return of 5 per cent on their capital outlay coupled with the free grant of land required. Under the system of 1870, railway developments were to be made by direct State Agency from borrowed capital, instead of seeking the aid of private capital; the system of 1879, while upholding this policy, put certain restrictions on the extent of borrowings; but the system of 1880 again evoked the aid of private capital, under a guarantee, although the terms were easier for Government than in the old system of guaranteed companies in vogue prior to 1870.

By 1883, however, the finances of the country had considerably improved. The limit of borrowing was raised from R2 crores to R3½ crores annually, of which about R3 crores were assigned to railways. Railways were to be made as required but were, as a rule, to have a good prospect of repaying their interest charge, those for famine purposes being paid for, with irrigation works, from the Famine Insurance grant. Since 1885, when the first programme under the new conditions was introduced, the annual expenditure on railways has constantly increased. In 1890 the whole available balance of the Famine Insurance grant was devoted to railway construction and in 1892 half a crore was being especially added to capital expenditure to enable companies to undertake new lines of railway and extensions with sums borrowed by Government. As the exchange continued to fall and affect seriously the finances of India, another attempt was made in 1893 to work through companies. As the guarantee involved a gold liability, a subsidy was offered instead. This took the form of a rebate or payment from the gross earnings of the main line from traffic interchanged with the company's lines, so that the total profits of the company should yield a dividend of 4 per cent. The rebate was, however, limited to 10 per cent of the gross earnings from such traffic. These conditions were not found sufficiently attractive and the terms were again revised in 1896. Companies were now offered either an absolute guarantee of 3 per cent with a share of surplus profits, or a rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent on the capital outlay. As regards railways passing through Native States, the money has in some cases been found from the revenues of the States, in others it has been lent to the States by Government, and in others again Government has guaranteed loans made to a State by a company.

way
ramme

The question how best to provide funds for a wider development of the railway system was considered and sanction was given in 1896-97 to an expenditure of nearly Rs 30 crores spread over 3 years, but this programme could not be carried out owing to many adverse circumstances affecting the revenues of Government. Since 1896 the expenditure incurred not only by the State railways but by those guaranteed by the State has been included in the railway programme; and in 1901 it was decided to adopt the principle of regarding the needs of open lines for rolling stock, stations, goods sheds, permanent way, etc., as a first charge upon the funds available, thereafter the completion of lines in progress, and lastly the claims of new lines, and the money was proposed to be obtained by borrowing in London and India, by appropriations from the Famine Insurance grant, and by utilisation of surplus revenues and Savings Bank deposits.

rate
prise

Though the amount made available for capital expenditure on Railways has been increased over a series of years, the balance available for Imperial funds for the construction of new lines has tended to diminish. Since 1909, when the Imperial funds devoted to new construction reached a low figure, increasing efforts have been made to augment the supply of funds from other sources. In June, 1910, more liberal terms than those previously conceded were offered, and under these terms private enterprise had two alternative forms of assistance, namely, (1) a rebate paid by parent lines from its net earnings from traffic brought to it by the feeder railway, sufficient to make up 5 per cent on the capital outlay, thus limiting the liability of the main line railway, but holding out a fair prospect of a 5 per cent return, and (2) a firm guarantee from Government of $3\frac{1}{2}$ per cent on capital outlay. But it has been patent that the capital raised by a company may at times be considerably more than that for the time being expended and that even under the second alternative shareholders in branch line companies were not assured of any definite return. For this reason, in November, 1913, revised terms were offered and they differed from those of 1910 mainly in the substitution of *paid-up capital* for *capital outlay*. The guarantee terms, however, offer one very distinct advantage in so far as the shares of these companies are available for the investment of trust funds. In order to encourage investments of this class one of the modifications introduced in 1913 was a clause in the terms which rendered it possible for companies to be floated partly on the rebate and partly on the guarantee terms.

dict
rds

Another agency for financing feeder railways has been found in the District Boards. These local bodies have become fully alive to the advance in the general welfare of a district which is to be anticipated from the improvement of communications. Since 1884 District Boards in Madras have been empowered to levy a special Railway cess not exceeding 3 pies per rupee of land revenue; and it has since been decided that all local Governments who may wish to do so, may legislate for the levy of a similar cess by which means, it is hoped, much encouragement may be given to the construction of local feeder railways at the cost of local funds.

ministra-
and
rol

Up to 1905 the administration of the railways in India was controlled by the Public Works Department of the Government of India. In that year the control was transferred to an expert Railway Board, consisting of a Chairman and two members. The duties assigned to the Board were of two kinds. (1) Its deliberative functions included the preparation of the railway programme of expenditure and the discussion of the greater questions of railway policy and finance affecting all lines. As regards such questions, the ultimate decision necessarily continued to rest with the Government of India and the Secretary of State in Council. (2) Its administrative duties included the construction of new lines by State Agency, the carrying out of new works on open lines, the improvement generally of railway management, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines. The final authority in regard to these duties was delegated, subject to restrictions, to the Railway Board. In 1907 a Committee on Indian Railway Finance and Administration was appointed by the Secretary of State for India. The Committee came to the conclusion that the system under which the Railway Board worked was not satisfactory, and suggested improvements. After consideration of their recommendations, it was decided to introduce in 1908 certain changes, the Chairman of the Board becoming President with enhanced powers, and the Board being made independent of the Commerce and Industry Department Secretariat.

istics

The tables in this volume are compiled from the statistics given in the Report on the Administration of Railways in India issued by the Railway Board, except table No. 97 (Revenue account of the railways in respect of which Government is financially responsible) which is compiled from the Finance and Revenue Accounts of the Government of India. The Administration Reports published up to 1912 had reference to the working of each calendar year. Owing to the adoption, by the principal railway administrations, of the Government financial year (1st April to 31st March) for all accounts and statistical purposes, the Administration Reports have, with effect from 1st April, 1913, been published for the financial year.

n
ago

The number of miles of all railways open for traffic at the end of 1915-16 was 35,833 as compared with 29,303 in 1906-07, the increase in the decade being thus 6,530 miles or 22 per cent. Of this, 18,060 miles were of the standard-gauge ($5\frac{1}{4}$ '), 14,671 miles of the metre-gauge ($3' 3\frac{3}{8}"$), and 3,102 miles of other gauges ($2\frac{1}{2}'$ and $2'$). Of the standard-gauge 15,577 miles, of the metre gauge 9,442 miles, and of other gauges 1,242 miles were owned by Government.

ital
ay

Up to the close of the year 1915-16 the capital outlay on all railway lines open for traffic amounted to Rs 29,98 lakhs as compared with Rs 71,27 lakhs at the end of 1906; the increase in the decade being 43 per cent. Of this total capital outlay of Rs 29,98 lakhs, the outlay on State railways amounted to Rs 4,69,22 lakhs. The outlay incurred during 1915-16 on lines in which the State is financially interested amounted to Rs 74 lakhs.

The gross earnings of all Indian railways during the year 1915-16 amounted in round figures to Rs 64,66 lakhs, compared with Rs 60,42 lakhs in 1914-15, or an increase of Rs 4,24 lakhs or 7 per cent. This total amount of Rs 64,66 lakhs of gross earnings consisted of goods traffic Rs 38,76 lakhs, coaching traffic Rs 24,14

lakhs, electric telegraph R10 lakhs, steam boat R23 lakhs, and sundries R1.43 lakhs. The working expenses were R32.92 lakhs as against R32.74 lakhs in 1914-15. The net earnings thus amounted to R31.74 lakhs against R27.68 lakhs in 1914-15, or an increase of R4.06 lakhs or about 15 per cent. These net earnings yielded a return on the capital outlay (R5,29,98 lakhs) on open lines, *i.e.*, on mileage earning revenue, of 5.99 per cent, as compared with 5.33 per cent in 1914-15 and 6.19 per cent in 1913-14. Details of the results of working in 1915-16 of each railway system, which includes branch lines and lines under the same management, are shown in table No. 99.

Up to the end of 1898-99 the railways in respect of which Government was financially interested worked at a loss to the State, owing partly to the yearly additions of new and undeveloped lines and partly to the increased payments to certain guaranteed companies necessitated by the fall of exchange; but with the termination of the guarantee of the Great Indian Peninsula Railway and the development of traffic, the revenue has, excepting the single set-back in 1908-09, a famine year in North-Western India, exceeded the expenditure. The deficit in 1908-09 was ascribed to a fall in gross receipts combined with an increase in working expenses. The net gain to the State in 1915-16 was R6.11 lakhs as against R3.24 lakhs in 1914-15. This surplus gives a net profit to Government (after paying all charges including interest) of 1.3 per cent on the capital outlay on State railways; but, as already stated above, the net earnings of all railways yielded a return to the railways of 6 per cent on the total capital outlay.

The total number of passengers carried by Indian railways in 1915-16 was in round numbers 464 millions as against 451 millions in the preceding year, or an increase of 3 per cent. This total comprised first class passengers, 3,791,000 second class, 13,648,000 intermediate class, 413,254,000 third class passengers, and 32,959,000 for trips which the holders of season and vendors' tickets are assumed to have made on the prices paid for their tickets. The total earnings from passenger traffic amounted to R20.99 lakhs, or an increase of 3 per cent over the preceding year. The increase in the passenger traffic during the year under review as compared with that of 1914-15 was chiefly due to the revival of traffic, after the outbreak of war, to the opening of new lines, to the movement of troops, and to fairs, pilgrimages, and marriage parties.

The total quantity of goods carried during the year 1915-16 was 82,499,000 tons, which is greater than that of the preceding year by 2 per cent; and the total earnings from goods traffic increased from R35.09 lakhs in 1914-15 to R38.76 lakhs in 1915-16, *i.e.*, by 10 per cent. The better results of the year

	1905	1915-16
	Pies	Pies
Passengers { First class	13.16	13.68
Second class	5.74	5.50
Intermediate class	3.06	3.16
Third class	2.29	2.29
Season and vendors' ticket holders	1.38	1.42
Goods (per ton)	5.42	4.34

are attributable to the recovery of trade, as in the case of the coaching traffic, to the opening of new lines, and to the movement of military stores. The diversion of coal traffic to Bombay, from the sea to the rail route, owing to the abnormal shortage of shipping, was also largely accountable for the increase. The average rates charged per mile per passenger of each class and per ton of goods carried during the year 1915-16 are stated in the margin as

compared with those ten years ago.

The total number of locomotives at the end of 1915-16 numbered 8,674, of which 1,982 were employed exclusively on passenger working, 2,695 on goods working, and 3,997 on mixed working. The number of coaching stock was 23,375 and that of goods stock 188,719.

The total train-mileage (including miscellaneous train miles) was 159,038,000 in 1915-16 as against 157,142,000 in the preceding year. Of this, coaching train miles numbered 56,364,000 and goods train miles numbered 62,766,000. The gross earnings per train mile worked out to R4.07, the working expenses R2.07, and the net earnings per train mile R2.00.

The total number of servants in railway employ at the close of the year 1915-16 was 626,580 as against 600,483 in the preceding year. Of this number, 7,273 were Europeans, 10,412 Anglo-Indians, and 608,895 Indians. Of the Europeans and Anglo-Indians 15,449 were enrolled as volunteers. At the close of 1915-16 there were 11,232 children and 10,474 apprentices and workmen attending the railway schools.

The total number of persons killed by railway accidents during the year 1915-16 was 2,418, as against 2,367 in the preceding year. Of this number, 247 were passengers, 433 railway servants, and 1,738 other persons. The total number of persons injured in 1915-16 was 2,153, of whom 821 were passengers, 796 railway servants, and 536 other persons.

IRRIGATION

[FOR TABLES, SEE PAGES 204 TO 219]

Irrigation has been resorted to in India from time immemorial as a means of supplementing the natural rainfall and of storing water for use at critical periods. In general it may be said that the security of the harvest depends on the existence of some form of irrigation in almost all parts of India, except in tracts such as Eastern Bengal, Assam, Lower Burma, and the Malabar Coast where the average rainfall is not less than 70 inches in the year.

Irrigation works are of three great types—lift, storage, and river works—which are represented by wells, tanks or reservoirs, and canals. About 25 per cent of the irrigated area, or 12,000,000 acres, are irrigated from wells; the average area irrigated by tanks is about 7,000,000 acres, and over 20,000,000 acres are irrigated by canals. The wells and smaller tanks are often the property of private individuals, but the larger tanks and

the canals are generally undertaken by Government. The statistics given in this volume relate only to works constructed or maintained by Government.

Irrigation canals are not always suitable for navigation, and many canals have been constructed for navigation which do not irrigate a single acre. Not one navigable canal is directly remunerative, and in many cases the navigation receipts do not cover the working expenses. The great rivers are navigable by steamers all the year round, and there are innumerable small rivers, tributaries, creeks, and backwaters, which are fully utilized by small craft.

Financially considered, irrigation works are classed as "major" and "minor," the former being subdivided into (1) Productive, and 2) Protective, works. The most important irrigation works in India are those classed as "Productive works" or works the capital cost of which has been wholly or mainly provided from borrowed money in the expectation that they will prove directly remunerative and that the net revenue derived from them will fully cover all charges for interest within a reasonable time (10 years) after their completion. "Protective" irrigation works are those which have been sanctioned in consideration of their value in protection against famine, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the grant under Famine Relief and Insurance. Capital and revenue accounts are kept for all major works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts or indirectly on account of enhancements of land revenue due to irrigation, is shewn in the Finance Accounts. Minor works are constructed from funds provided from the current revenues of India, and, broadly speaking, consist of irrigation systems which are not sufficiently important to treat as major works. Some of them are old works constructed by the former rulers of this country, and extended or restored by the British Government; some are works which have been constructed by the British Government; others, again, are village works originally provided by private or communal effort, the control of which the State has been obliged to assume owing to disputes between the parties interested or their inability to maintain the efficiency of the works. Minor works are of three classes, namely:—(1) Works for which capital and revenue accounts are kept. All expenditure incurred in the construction and development of minor irrigation works of this class is met from the ordinary revenue. There were 119 works so classed in 1915-16, the majority of which are in Bombay and Madras. (2) Minor works for which only revenue accounts are kept, either because the works are too small or because they have not been constructed by Government, which has simply undertaken their improvement or maintenance. They are credited with a share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. (3) There is a third class of minor works, chiefly existing in the Madras Presidency, for which neither capital nor revenue accounts are kept. These minor works in Madras include some 37,000 tanks and irrigation channels, the improvements and repairs of which are executed by the Public Works Department, or in the case of smaller works, by civil officers.

Table No. 106 shows the principal results of the operations for the year 1915-16, while table No. 107 shows the mileage of canals in operation and the area irrigated. Table No. 108 gives the financial results of the works at the end of each year from 1896-97 to 1915-16. The chief features of these tables are given

	Mileage	Area irrigated Acres	Capital out- lay to the end of 1915-16 R	Net revenue during 1915-16 R	Percentage on capital outlay
Major Works—					
Irrigation—					
Productive	44,215	15,227,952	56,20,91,736	4,53,54,146	8
Protective	3,159	386,261	9,13,67,246	4,50,175	4
Navigation	29	..	94,87,157	—11,874	..
TOTAL, MAJOR	47,403	15,614,213	66,29,36,139	4,57,92,447	6.9
Minor Works—					
Irrigation	4,529	1,726,420	4,27,69,491	32,45,206	7.5
Navigation	304	..	2,21,73,386	—3,02,597	..
TOTAL, MINOR	4,833	1,726,420	6,49,42,877	29,42,609	4.5
GRAND TOTAL	52,236	17,340,633	72,78,79,016	4,87,35,056	6.6

in the margin. At the end of 1915-16 the total mileage of major works was 47,403 and of minor works 4,833 as against 46,550 and 5,043, respectively, at the end of the previous year. The area irrigated during the year 1915-16 was 17,341,000 acres, of which productive major irrigation works covered 15,228,000 acres, minor irrigation works 1,726,000 acres, and protective major irrigation works 386,000 acres. The capital outlay to the end

of the year 1915-16 was about R73 crores, divided between the last mentioned classes in the proportion of 77 per cent, 9 per cent, and 13 per cent respectively. The net revenue realised during the same year amounted to R4,87 lakhs, namely, R4,54 lakhs from productive major irrigation works, R29 lakhs from minor irrigation works, and R4½ lakhs from protective irrigation works. In the last ten years the net revenue from irrigation and navigation works has increased by 26 per cent—from R3,85 lakhs in 1906-07 to R4,87 lakhs in 1915-16. Table No. 109 shows for each province the mileage of different main canals in operation and the area irrigated

	Productive			Protective		Minor irrigation		Navigation
	Number of works	Mileage	Area	Mileage	Area	Mileage	Area	
Bengal	1	325	83,640	29
Madras	16	12,113	2,151,403	231	50,415	1,186	144,368	304
Bombay	15	3,347	1,304,657	589	83,546	2,385	862,100	..
United Provinces	7	9,755	2,922,251	1,460	164,459	555	151,283	..
Bihar and Orissa	2	3,216	815,947	265	60,782	23
Punjab	11	13,815	7,366,402	216	48,765	..
Burma	4	696	266,016	496,105	..
Central Provinces	3	194	10,482	614	27,059	56	1,825	..
North-West Frontier	4	754	307,145
British Baluchistan	108	21,774	..

at the end of each year from 1911-12 to 1915-16. The details for 1915-16 are given in the margin. Madras and the Punjab account for about 12,000 and 14,000 miles of productive major irrigation works with an area of 2 million and 7 million acres, respectively. The United Provinces come next with

nearly 10,000 miles and an area of about 3 and million acres, and Bombay, and Bihar and Orissa each about 3,000 miles with 1,300,000 and 816,000 acres, respectively. The protective major irrigation works are the largest in the United Provinces with 1,460 miles and about 200,000 acres, Bombay and the Central Provinces accounting for about 600 miles each with 83,000 and 27,000 acres, respectively. Under minor irrigation works Bombay stands foremost with 2,300 miles and 862,000 acres.

The Ganges Canal, the Lower Ganges Canal, and the Eastern Jumna Canal are the most remunerative works in the United Provinces. In the Punjab the greatest amount of net revenue is obtained on the Lower Chenab Canal, which promises developments due to recent extension. The Upper Bari Doab Canal, the Lower Jhelum Canal, the Western Jumna Canal, and the Sirhind Canal are also very remunerative. The Godavari, the Kistna, and the Cauvery Delta Systems are the most remunerative works in Madras.

Table No. 110 gives the details of irrigation and navigation in each province in each year from 1911-12

	Area irrigated	Water rate per acre	Navigation		
			Open mileage	Cargo	Passengers
	Acres	R		Tons	Number
Bengal	83,649	2.06	1,396	1,407,816	132,238
Madras	3,990,631	4.33	1,329	944,716½	609,835
Bombay	2,419,397	2.86
United Provinces	3,781,110	3.25	412	24,781	10,686
Bihar and Orissa	940,536	2.66	518½	163,199	80,890
Punjab	8,465,633	4.54	360	..	20,605
Burma	765,474	3.84
Central Provinces	37,541	2.33
North-West Frontier	342,738	2.76
Ajmer Merwara	21,001½	4.29
British Baluchistan	6,574½	7.34

to 1915-16. The details for 1915-16 are summarised in the marginal table. Of the total irrigated area the Punjab contains 8.5 million acres, Madras nearly 4 million acres, the United Provinces 3.8 million acres, Bombay 2.4 million acres, Bihar and Orissa nearly a million acre, and Burma 765,000 acres. The average water rate per acre is Rs. 7 in British Baluchistan, about Rs. 4 in Madras, the Punjab,

Ajmer-Merwara, and Burma; nearly Rs. 3 in Bombay, the United Provinces, Bihar and Orissa, and the North-West Frontier Province; and about Rs. 2 in Bengal and the Central Provinces.

(a) Figures for 1896-97, prior to which they were not obtained

(c) At 144 per ton (value at the pit's mouth)

(d) Figures from 1905 relate to official years, and the value calculated on the wholesale price of salt-petre at Calcutta

(e) For February and March 1896

(b) Figures represent exports in each official year

(f) The figures previous to 1917 represent exports in each official year

INDUSTRIAL CENSUS*

No. 2.—STATEMENT showing the MAIN RESULTS of the INDUSTRIAL CENSUS* in INDIA taken in 1911

Description of Factory, etc.	Number of factories	NUMBER OF PERSONS EMPLOYED					Number of females employed per 100 males	Province or State, where chiefly found, with percentage of number of persons there employed to total number in India
		DIRECTION, SUPERVISION AND CLERICAL WORK		WORKMEN		TOTAL		
		Europeans and Anglo-Indians	Indians	Skilled	Unskilled			
I. GROWING OF SPECIAL PRODUCTS	1,687	1,627	10,346	18,446	779,988	810,407	84	
Coffee plantations . . .	482	249	1,300	1,997	54,077	57,623	79	Madras (37); Mysore (43); Coorg (19).
Indigo plantations . . .	121	98	2,076	2,486	26,135	30,795	16	Bihar and Orissa (100).
Tea plantations . . .	1,002	1,150	6,543	12,074	683,818	703,585	91	Assam (70); Bengal (27).
II. MINES	562	1,164	4,911	71,695	146,317	224,087	38	
Collieries	353	326	3,846	57,068	81,637	142,977	43	Bengal (26); Bihar and Orissa (61).
Gold Mines	12	577	157	6,381	21,477	28,592	8	Mysore (88).
III. QUARRIES OF HARD ROCKS . . .	53	22	280	1,218	10,744	12,273	29	
Stone and Marble Quarries . .	50	21	257	1,147	10,441	11,866	29	Bombay (32)
IV. TEXTILE INDUSTRIES	1,487	1,426	18,597	250,580	286,986	557,589	25	
Cotton	1,127	573	12,585	167,191	127,841	308,190	29	Bombay (62)
Jute, hemp, etc.	223	731	4,744	66,065	150,776	222,319	21	Bengal (97).
V. LEATHER INDUSTRIES	158	105	829	5,742	6,936	13,612	9	
Tanneries	122	41	589	3,814	4,955	9,399	7	Madras (47); Bombay (17).
VI. WOOD, ETC., INDUSTRIES	168	185	1,955	11,506	15,421	29,067	3	
Saw mills	106	120	1,535	2,869	7,966	12,490	6	Burma (79).
Timber yards	27	17	227	5,650	5,551	11,445	..	Bihar and Orissa (83).
VII. METAL INDUSTRIES	372	1,243	3,886	34,115	31,801	71,045	4	
Machinery and Engineering Workshops.	93	413	1,375	12,661	8,698	23,147	2	Bengal (51); Bombay (23).
VIII. GLASS AND EARTHENWARE INDUSTRIES.	153	67	1,423	10,532	37,444	49,466	24	
Brick and tile factories . . .	411	56	1,197	9,120	35,783	46,156	23	Bengal (48).
IX. INDUSTRIES CONNECTED WITH CHEMICAL PRODUCTS.	155	586	2,747	12,023	34,002	49,358	13	
Oil mills	208	45	978	1,959	6,763	9,745	20	Bengal (44); Madras (21).
Petroleum refineries	9	212	240	2,942	7,464	10,868	..	Burma (99).
X. FOOD INDUSTRIES	720	486	4,869	11,243	57,803	74,401	16	
Flour and rice mills	403	201	2,757	5,690	33,726	42,374	12	Burma (70).
XI. INDUSTRIES OF DRESS	90	209	663	7,263	2,054	10,189	4	
Boot and shoe factories . . .	23	70	240	4,054	799	5,163	3	United Provinces (64); Bombay (15).
XII. FURNITURE INDUSTRIES	50	30	235	2,102	1,005	3,372	2	
Furniture factories	46	27	219	1,897	967	3,110	2	Bengal (29); Bombay (16).
XIII. INDUSTRIES CONNECTED WITH BUILDINGS.	163	82	638	3,292	18,156	22,168	30	
Lime works and kilns	53	17	230	359	7,024	7,630	39	Bombay (51); Central Provinces and Berar (23).
Stone, marble and cement works.	57	55	214	1,445	5,891	7,605	34	Bihar and Orissa (37); United Provinces (31).
XIV. INDUSTRIES CONNECTED WITH TRANSPORT.	242	1,302	1,155	80,805	38,855	125,117	1	
Railway workshops	118	834	3,064	65,400	29,365	98,723	1	Bengal (23); Bombay (16).
XV. PRODUCTION AND TRANSMISSION OF PHYSICAL FORCES.	64	262	414	4,351	3,142	8,169	16	
Gas works	14	122	176	3,165	1,217	4,680	..	Bengal (73); Bombay (23).
XVI. INDUSTRIES OF LUXURY	389	641	4,837	29,865	10,161	45,504	1	
Printing presses.	341	500	1,416	27,688	9,094	41,598	1	Bengal (30); Bombay (21). Madras (16).
TOTAL, INDIA	7,113	9,437	60,794	554,778	1,480,815	2,105,824	38	
Factories in which MECHANICAL POWER IS USED.	4,569	8,369	50,597	492,576	1,252,450	1,803,992	38	
Factories in which MECHANICAL POWER IS NOT USED.	2,544	1,068	10,197	62,202	228,365	301,832	41

* Compiled from special official returns

(a) No brewing done (b) Production for 3 months ending 31st March, since closed

† From 1st January, 1908, the contracts with Indian breweries for the supply of malt liquor to British troops have been discontinued, each British regiment being left free to make its own arrangements to obtain the necessary supply; as a result, the figures of Army consumption are no longer readily available

† The quantity (in gallons) of imported beer is as follows :—

1913	4,034,000
1914	4,213,000
1915	2,918,000

* Compiled from special official returns

(a) Capital of five mills only. The increase in 1914 is due to the New Egerton Mill having increased its authorised capital from R12 lakhs to R1 crore

(b) Capital of four mills, [See also footnote (a)]

(c) Capital of three mills only, [See also footnote (a)]

(d) The quantity produced by one of the mills was not reported

(e) Excluding 42,000 blankets for which the weight has not been given

(f) " 150,000 " " "

(g) One of the mills in the Punjab was closed

(h) Capital of four mills. The increase in 1915 is due to the Cawnpore mill having increased its authorised capital from R25 lakhs to R150 lakhs.

NOTE.—For figures for earlier years, see the sixth issue of the Statistics of British India, Part I

No. 23.—NUMBER, CAPITAL, LABOUR, LOOMS, and SPINDLES of the WOOLLEN MILLS in INDIA
on the 31st December 1915

LOCALITY	NAMES OF MILLS	WHEN ESTAB- LISHED	CAPITAL OF JOINT-STOCK COMPANIES (A = AUTHO- RISED P = PAID-UP)	NUMBER OF		AVERAGE DAILY NUMBER OF PERSONS EMPLOYED	DESCRIPTION OF GOODS
				Looms	Spindles		
BENGAL—			R				
Calcutta	Crown Woollen Mills	1913	Private .	16	960	80	Woollen blankets.
UNITED PROVINCES—							
Cawnpore	Cawnpore Woollen Mills	1876	{ A.1,50,00,000 P.55,00,000 }	549	20,208	3,522	Blankets, great coat cloths, serges, broad cloths, woollen and worsted materials generally, including hosiery, travelling rugs, putties, knitting yarn, Berlin wool, braid, and felts.

* Compiled from the annual report of the Port Officer and Registrar of Wrecks, Calcutta

† Incomplete, the tonnage of some vessels not being known

‡ The unusually large number of British vessels lost in 1914 is due to the depredations of German cruisers in Indian waters after the outbreak of war

MERCHANDISE MARKS*

No. 74.—DETENTIONS under the INDIAN MERCHANDISE MARKS ACT in each official year from 1896-97 to 1915-16

		NUMBER OF DETENTIONS(a)				Cases in which detention was ordered on information received	CASES IN WHICH DETENTION WAS FOLLOWED		
		Counterfeit trade marks or false trade descriptions	Non-description or false description of origin	Unstamped or insufficiently stamped piece goods	TOTAL		By confiscation	By release	
								With fine	Without fine

(a) For earlier figures see the 13th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of "Statistics of British India," Part III

(b) Figures up to 1900-01 relate to the old circle "Assam" and those from 1905-06 to 1913-14 relate to the old circle "Eastern Bengal and Assam"

(c) Figures up to 1913-14 relate to the old circle "Bengal"

(d) The figures for Rajputana and Central India are not Native State figures but figures of the Imperial Post Office for the Central India Circle (now abolished) and the Rajputana Circle (which has also now been merged in the "Central Circle")

(e) Abolished from the 1st July, 1894

(f) Abolished from the 1st July, 1907, and incorporated with the Punjab and Bombay circles. Includes figures from April to June, 1907

in each CIRCLE, from 1870-71 to 1915-16

NOTE.—The figures for letters, postcards, newspapers, and packets are estimated from the actual figures for 14 days of the year, but for parcels they represent the actual number posted during the year.

(a) For earlier figures, see the 19th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of "Statistics of British India", Part III.

(b) From 1899-1900 includes registered newspapers only, other newspapers being counted as packets.

* The figures from 1870-71 to 1880-81 include those of Ceylon Telegraphs and those from 1882-83 to 1891-92 include Provincial Telegraphs

† The large increase in the number of free telegrams is due to a new and more correct method of numbering multiple telegrams

(a) Inclusive of 80,560 State press telegrams, value R44,699

(b) Inclusive of 150,368 State press telegrams, value R75,652

VALUE of MESSAGES, and REVENUE and CHARGES per mile, from 1851-52 to 1915-16

* Excludes lines for which information regarding "capital outlay," "gross earnings," etc., is not available

† Capital outlay on lines open, etc., on mileage earning revenue

(a) Estimated

(b) The decrease is due to the revision of the capital outlay in consequence of the substitution of the actual expenditure incurred on the construction of lines purchased by the State from Guaranteed Railway Companies as shown in rupees in the accounts of these Railways at date of purchase for the total purchase price converted at £1=₹10, which was erroneously taken in stating the Capital expenditure in previous Railway Administration Reports

Note—From 1913-14, financial years, 1st April to 31st March, have been adopted for reasons explained in the Introductory note

and TRAFFIC of ALL RAILWAYS, from 1853 to 1915-16
